Little-Tree Farms

1932,

Catalogue
& Year Book 41

WHAT IS . . . ? LITTLE-TREE FARMS!

Little-Tree Farms is a place—A place of beauty and interest. Hundreds of fertile well-tilled acres covered with their showy crops of evergreens, shade trees, shrubs, perennials and roses. A place of activity and enterprise. A pleasant place to work in, a delightful place to visit.

Little-Tree Farms is an organization. A lot of busy people making a living, like the rest of the world, for themselves and their families and most of the time having a good time doing it. Executives, landscape architects and engineers, draftsmen, salesmen, stenographers, accountants, foremen and work crews, with all sorts of machines and tools to make their work effective.

Little-Tree Farms is an idea. An idea or rather an ideal that knits and binds the place and the organization, men and materials into a common unity of purpose. An ideal that is bigger than the whole plant and all its multiform resources, and as simple as it is big. "To render a **complete** horticultural service."—A service to you! So that whatever may be your need to make the environment of your home more beautiful and desirable you will look to Little-Tree Farms for it, satisfied that you will receive that service promptly, economically, satisfactorily.

This Book is a phase of that service. A catalogue and price list of part of the garden materials we have produced or collected for you at Little-Tree Farms. We hope it will bring you pleasure and profit. But it is necessarily designed with a general appeal, and it is the aim of Little-Tree Farms' service to fit itself to your own particular need. If that need lies outside of the scope of this catalogue, let's talk it over—by telephone or mail, or, still better, face to face in person.

LITTLE-TREE FARMS

ON PLEASANT STREET, FRAMINGHAM CENTRE, MASS.
TELEPHONE FRAMINGHAM 1768

A Glimpse of Little-Tree Farms from the Air

IF YOU can't drop in for a visit right away take a peep at Little-Tree Farms as you pass over. Even in an airview photograph we can't show you all of it, but here is the heart—the group of administration buildings and the growing fields that surround them.

The heavy line of tree tops running diagonally across the picture marks Pleasant Street, going to Marlboro and Worcester on its way from Framingham Centre and Boston (Route 115). The large building at the extreme right with the cupolas is the

Storage and Packing Houses with the shipping platform. In front, concealed by the large trees in the foreground, is the large glass-enclosed Sales Building and Garden Store which contains a wide selection of articles to interest the garden lover, including garden furniture, pottery, glass, tools, books and other items too numerous to list even in the catalogue.

Between these two buildings, sheltered from the wind, lies a broad parking space for customers' cars, while above them on a slight rise of land stands the Office Building with its busy staff of executives,

accountants, salesmen, landscape architects, engineers, draftsmen and stenographers.

Beyond the General Offices and enclosed in stately pines is the West Lawn, a favorite meeting place for garden clubs in pleasant weather.

Across the road are Demonstration Gardens and on each side are acres of growing fields cut into squares of living green by wide roadways. If you come by car instead of by plane, you are welcome to drive through the nurseries and get "close-ups" of the individual plants. In the hope that you can soon do so—we cordially invite you to visit Little-Tree Farms.

LITTLE-TREE FARMS EVERGREENS

BIG TREES—Medium Trees—Little Trees. They are all here. Nearly 30 years ago there were 20,000,000 *little* evergreens at Little-Tree Farms. Now there are all sizes.

More evergreens in the *larger* sizes are to be found at Little-Tree Farms than in any other nursery in the country. They are ready to move to your place and immediately help bring to it that air of dignity, permanence and well being which comes from developed plantings. Thousands of customers buy them. Every year evergreens, big and little, go from here to other homes in carloads and truckloads, in boxes and bales, in automobiles and even carried in hand, but we propagate more and there are always plenty of splendid plants.

Little-Tree Farms' evergreens can be moved with almost no *transplanting* risk. Their root systems have been developed through the years always with that purpose in mind. The accompanying pictures tell something of their life history in a graphic way. They don't just grow. Frequent careful transplanting and root pruning makes the compact root systems which insure *successful transplanting* to your grounds.

Once every two or three years, depending on rate of growth, every tree must be moved, roots which have grown too long must be cut back, the plants spaced to give more room and replanted.

These operations are expensive, but in no other way can be produced the splendid roots which assure to Little Tree Farms' customers nearly perfect *transplanting* success.

LITTLE-TREE FARMS

Great "Friendship Offer" for 1931

THIS is the same remarkable offer we made last fall. The response was so immediate and enthusiastic and we received such favorable comment that we have decided to repeat it for 1931. The ten dollars we ask for this collection will hardly pay for raising the plants and certainly does not cover the digging and packing nor the cost of this announcement.

But—we shall be more than repaid in thousands of new friends who will thus learn at first hand of the wonderful quality and value in Little Tree Farms' evergreens.

6 First Quality

OFFER Y-1

Please order by name and number

EACH one of these plants is a handsome specimen! Dense tops and big fibrous roots full of pep and vigor, ready at a minute's notice to decorate your doorstep or take a place on your lawn.

You can plant them yourself if you wish, as full planting directions accompany each offer. All six plants of the following six well known popular varieties, their roots with a ball of native loam around them wrapped and tied in burlap, are packed in a neat wooden crate for shipment. These are the plants.

1 Douglas Fir 3½ to 4 feet
1 Arborvitae 2½ to 3 feet
1 Red Pine 2 to 3 feet

1 Colorado Spruce 2 to 3 feet
1 Dwarf Mt. Pine 12 to 18 inches
1 Hovey Arborvitae 12 inches

Our prices include packing and are f. o. b. Framingham

Decorate Your House Front from Corner to Corner with This Little Tree Farms "HOME DECORATION OFFER"

WHEN you consider the number, size and superb quality of these plants, where can you duplicate this value except by ordering two of these offers? Plant them along your house front putting the taller plants in the background. Give them plenty of room and you will rejoice in the splendid effect obtained immediately.

The illustration above shows how much a group of evergreens adds to the beauty of a house front.

These are fourteen FIRST GRADE, several times transplanted evergreens in seven distinctly different and very desirable ornamental varieties.

THE FIRS

(Abies)

THE Firs are among the handsomest and stateliest conifers. Extremely hardy, they succeed best in a cool and humid climate.

Their symmetry of form and luxuriant, graceful and varicolored foliage make them eminently desirable and increasingly popular. Ideal trees for lawn specimens and screen plantings.

Balsam Fir
4 to 5 feet
\$7.50 each

BALSAM FIR

(Abies balsamea)

THIS is the fragrant Fir of our northern woods the true "Christmas Tree" of old, prized alike for its deep rich color and the delicious scent of its green boughs. A rapid grower. The needles, flat and characteristically smaller than most other evergreens are borne horizontally giving the tree a more open appearance. Their color is dark green with lighter green on the underside. Each twig ends in a globule of Balsam gum.

The color of the Balsam Fir is exceptionally beautiful and the foliage contrasts pleasingly with that of the Spruces and Pines. Use in groups and in the background of borders. Does remarkably well in cool moist places under other evergreen trees.

WHITE FIR

(Abies concolor)

THE White or Silver Fir is one of the most beautiful evergreens grown for landscape purposes. The silvery toned foliage, varying from sea-green to deep blue is lovely at all seasons, but especially so in the spring when the new growth is a shimmering light green. The soft needles, long and slender, thickly cover the branches, giving the tree richness of tone seldom equalled among the evergreens. Almost as blue as the Colorado Blue Spruce.

The outline of the tree is conical and its lower branches are long retained. Its perfect form and graceful even habit of growth make it a great favorite.

This Fir, moderately rapid in growth, is perfectly hardy. It grows in any kind of soil, but thrives best in well drained clay or loam with a

Our prices include packing and are f. o. b. Framingham

gravelly sub-soil. Succeeds in partial shade and withstands heat and drought well.

The sizes between four and nine feet, offered below, produce splendid effects when used as specimens on the lawn, planted singly or in groups; as background plants in the evergreen border or bordering the edge of woods.

The short flat needles of Balsam Fir.

White Fir—note the long silvery needles.

White Fir is superb as a lawn specimen.
Suitable for large or small lawns.

Little Tree Farms has for the past twenty-five years recognized the unusual merits of this tree and has grown Douglas Fir in large quantities. Our large production permits us to sell this marvelous tree at astonishingly low prices.

DOUGLAS FIR

(*Pseudotsuga douglasi*)

NO EVERGREEN tree has gained more in popularity during the past few years than the DOUGLAS FIR. Its beauty is difficult to exaggerate, and its extreme hardiness, adaptability to a variety of soils and sun or shade has rightfully earned for it the title of "The All-around Evergreen."

A superb tree for the lawn, growing more beautiful with age.

Block of typical Douglas Fir photographed at Little Tree Farms November, 1930.

Douglas Fir
6 to 7 feet
\$11.00 each

Douglas Fir is a tree of tall symmetrical habit and handsome pyramidal outline. The foliage is beautiful, varying in color from a dark green to a bluish-silvery hue. The branches are horizontal with a slight curve downward in the center and a graceful upward turn at the ends. As the tree matures, the lower branches hold their symmetry and density unusually well, offering no breaks or unevenness from the ground up, and they acquire a certain individuality of outline, some conical, some flat-topped or slightly drooping, which gives decided variety to a group planting.

Pseudotsuga or False Hemlock, as the name implies, has the soft graceful foliage and slightly drooping habit of that species. In addition, it is absolutely hardy, standing very adverse conditions of high winds, extreme cold and poor soils. Known also as Douglas Spruce. It is a distinct genus or family with characteristics resembling Hemlock, Fir and Spruce.

In moist well-drained soils, it grows rapidly and attains a height of thirty-five feet in twenty-six years. In porous sandy slopes, the Douglas Fir makes sturdy, dense growth and presents an excellent appearance.

The fine qualities and adaptability of this splendid evergreen cannot be praised too highly. Because of its health and vigor, it thrives better than other evergreens in partial shade, retaining its lower branches to the ground. For the adverse conditions found in cities, thickly settled or factory districts, where the air is full of soot and gases, it is far ahead of any other of the larger growing evergreens.

Douglas Fir makes an especially fine lawn specimen and because of its uniform growth excels for planting along drives or formal allees.

As a background for garden or lawn, alone or in combination with other evergreens, it is most attractive. The dense, rich green foliage makes a most satisfactory screen for shutting out objectionable views.

*For explanation of grades see page 27.

(Douglas Fir—continued)

Because of its fine foliage, very rapid growth and numerous branches, it stands shearing exceptionally well, and makes an excellent evergreen hedge. Shearing two or three times during the growing season will keep it to the desired form and size. It does not need the frequent shearing that Privet and other commonly used hedge plants require.

THE CYPRESSES

(*Chamaecyparis*)

A NOBLE family of highly ornamental evergreens with beautiful feathery, almost fern-like foliage and irregular plume-like ascending branches curving slightly at the tip. They form picturesque cone-shaped trees some twenty-five feet in height.

Because of their surprising ability to make new growth, they are easily pruned to formal shapes and kept within bounds. Shearing once or twice a year is always beneficial and keeps growth regular and uniform.

Sawara
Cypress

2 to 3 feet

THE JUNIPERS

(*Juniperus*)

THE Junipers hold an unique place in our Landscape Art, furnishing for this country the exquisite outline which the classic Cypresses and the ancient Cedars gave to the gardens of the Old World.

The erect forms are ideal for accent points and the prostrate or semi-prostrate forms are excellent for planting about foundations and for ground covers on gravelly banks and slopes.

Pfitzer Juniper
3 to 4 foot spread
\$10.00 each

PFITZER JUNIPER

(*Juniperus chinensis pfitzeriana*)

A CHOICE semi-dwarf evergreen with spreading fan-like branches. The foliage is soft and of fine, rich blue-green color. Very hardy. Excellent for planting about the foundation, in the foreground, against tall growing evergreens, or for bordering walk or drive.

*SEVERAL TIMES TRANSPLANTED B & B

Ground Juniper is perfectly at home among big boulders in the rock garden.

Ground Juniper
2 to 3 foot spread
\$3.50 each

GROUND JUNIPER

(*Juniperus communis*)

ONE of the most satisfactory and best loved of the true low-growing evergreens. As its name implies, this is the dwarf Juniper that grows close to the ground forming broad mats of prickly silver foliage. It is one of the plants that give distinctive charm to our New England landscape.

The form varies; on some plants the branches lie flat upon the ground or curve upward at the tips, on others they grow erect, spreading and branching freely to form broad bushes.

The needles, small and scale-like, are sharply pointed and of a silvery grey color on the under

side. In winter the tips of the branches are tinged with deeper brown or purple. Frosty blue berries are borne in the fall and last well through the winter.

Extremely hardy and vigorous, it succeeds in the most barren and neglected soils and trying exposures. Wind-swept, sun-scorched rocky fields are its delight. In starting a new planting under adverse conditions provide good soil and winter protection for the first year.

Ground Juniper is useful wherever dwarf evergreens are required. Though its natural habit is to form a low broad bush up to ten feet across and two or three feet tall, it is readily kept in narrower bounds by cutting back the tips of the branches. It is a splendid low evergreen for massing and well adapted to planting as a permanent ground cover on sloping ground or in poor soil.

Along the hot south side of buildings; bordering a broad path, steps or drive; and for edging groups of taller evergreens it is at home. In the Rock Garden, too, it thrives, for rocky pastures and hillsides are its natural home. It flourishes in light sandy or gravelly soil but prefers a sunny position. We grow this beautiful evergreen in large quantities, and offer it at low prices so you may plant freely.

Spiny Greek Juniper
12 to 18 inch \$3.00 each

SPINY GREEK JUNIPER

(*Juniperus excelsa stricta*)

A FINE slow-growing Juniper with rather prickly foliage of rich, steel-blue green. Its form is cone-shaped, broad at the base, tapering towards the top. The needles stand erect and are very short, thick and numerous so that the tree naturally has the compact and impenetrable surface of a sheared specimen. As it matures the form assumes a wavy outline reminding one somewhat of Boxwood. Grows up to ten feet tall. Shear lightly and protect from winter winds to keep the foliage dense and green. A choice variety for accents, foundation work or formal planting.

*SEVERAL TIMES TRANSPLANTED B & B

Height	Each	10
12 to 18 inches	\$3.00	\$27.50

JUNIPER IRISH

(*Juniperus communis hibernica*)

ONE of the most popular, erect growing varieties which forms a highly decorative slender column or pillar up to ten feet tall.

The foliage — neat and feathery — is blue-green in color. It has a very close compact habit of growth, and somewhat irregular outline.

This is a great favorite for use alone or in pairs for formal accent. It contrasts sharply with the dwarf spreading types.

Irish Juniper can be used in cold climates, but should be planted in a sheltered spot or protected in late winter to keep the foliage at its best.

2 to 3 feet \$3.50 each

Savin
Juniper

18 to 24 inches
\$4.00 each

SAVIN JUNIPER

(*Juniperus sabina*)

A HANDSOME low-growing evergreen with thickly foliated slender branches spreading upward and outward from the center. One of the loveliest dwarf forms for planting around the house foundation or where height is not desired. The foliage contrasts charmingly with that of other evergreens.

*SEVERAL TIMES TRANSPLANTED B & B

Spread	Each	10
18 to 24 inches	\$4.00	\$35.00
12 to 18 inches	2.75	25.00

THIS tall, narrow Juniper is a picturesque feature of the whole New England countryside. Its slender spires climb over rocky hillsides or cluster in open pastures, in perfect harmony with the landscape.

Indifferent alike to moist ground and dry, barren soil, to the biting winds of winter and burning summer heat, it is vigorous and hardy in any sunny location.

The foliage is fine and scale-like, frequently varying in color and texture. Some branches are soft and feathery, of dark olive green, while others are harsh, prickly, and of a brighter color. In winter small light-blue berries frequently appear in great profusion and are very attractive to the birds.

The form varies from a narrow, even column to a bushy, tapering pyramid like that of the Arborvitae. No other tree native to this country so nearly approaches the Cypress of southern Europe in classic form, a characteristic which has long endeared it to lovers of beauty in our country.

The rugged, stately outline is seen to best advantage silhouetted against the sky, measuring the height of a tall building, or accent-

ing the different levels of slope and terrace.

Red Cedars are ideally suited to a great variety of formal uses. Their height gives depth and grandeur to a broad vista and enriches the flatness of formal beds and low planting. They are superbly used as formal accents to emphasize the balance and symmetry of garden design, to mark the approach to building or drive entrance and to frame formal views.

In a long row along path of drive they give a pleasing, even rhythm of light and shadow such as is possible with few other evergreens.

They can be used readily in a small garden, or for the tall accents about the house, as the branches do not have a wide spread nor cut off the sunlight from other plants around them. They are easily trimmed to form narrow, densely foliated trees.

Where an informal effect is desired in an open field or at the boundary of the lawn, there is nothing more lovely than a naturalistic grouping of Red Cedars and the spreading Ground Juniper. Plant several Red Cedars unequal distances apart and then arrange from five to twenty-five of the Ground Junipers irregularly around them.

One of the big eight to ten foot Cedars at Little-Tree Farms. All of them are sturdy and big rooted. Only \$20.00 each.

Our prices include packing and are f. o. b. Framingham, except as noted.

Cedars here make a charming setting for a big country house.

Because of its very fine foliage and free transpiration of water it is advisable not to plant in late fall in windswept locations.

In grading Red Cedars we measure from the bottom branches up. If it is desired to have the tree foliated to the ground set the roots low enough so any bare stem is buried. This does not harm the tree.

CEDARS FOR MASS PLANTING

For situations which do not require specimens we offer somewhat less regular plants at prices *one-third less than our standard grade*. These trees are several times transplanted, dug and shipped with a ball of earth. Reduced rate applies to quantities of 10 or more of one kind. If boxing for shipment is required, add 10%.

Sentinels along the drive vary this long border.

Dignity and repose are well expressed by the slender spires of green which guard the gate. Notice the contrast with the low evergreens in the foreground.

THE SPRUCES

(*Picea*)

A NOBLE family of tall growing conifers, a pyramidal in form, of massive structure and extremely rugged constitution. Easily recognized by their erect conical shape, their horizontal, slightly drooping layers of branches, and their short, stiff, sharp-pointed needles arranged in whorls around the twigs.

The Spruces are superb for mass planting wherever space permits and one of the handsomest of all evergreens for planting as individual specimens on the lawn. Little-Tree Spruces are notable for vigor of root and top, for symmetry and clear color.

Selected White Spruce 3 feet tall \$5.00

* B & B

WHITE SPRUCE

(*Picea canadensis*)

WHITE Spruce, native of northern colder parts of America is justly considered one of America's best conifers. It forms a handsome specimen 30 to 40 feet tall, somewhat smaller than the other Spruces. It is a favorite among tree-lovers as it combines great vigor and wide usefulness with marvelous beauty and distinction.

It is a rapid grower, extremely hardy and of compact conical shape. A very long-lived variety, trees over fifty years old keep their beauty, remain well branched to the ground, and annually make more growth. The short, shimmering light green needles withstand exposure to salt air, pressure of snow or ice, and both heat and drought better than other varieties.

White Spruce bears shearing and crowding well and may be kept to a smaller size by cutting back the top and slightly pruning the side branches. Its great density, fast growth and extreme hardiness make it especially desirable to

White Spruce

6 to 7 feet
\$10.00 each

Selected Colorado Spruce 3 feet tall \$7.00

* B & B

use as a tall hedge or windbreak for protection from wind and storms or for screening undesirable views.

A single White Spruce specimen is charming on the lawn where its symmetry is displayed to best advantage. Use it also for border plantings on lawn or drive, or at the entrance. Its color blends well with the soft toned evergreens such as the Blue Spruce and Silver Fir, while with others such as the Pines, Douglas Fir or Hemlock it contrasts not only in color, but in outline and the texture of its foliage.

Little-Tree Farms has long been known as the headquarters for superb White Spruces, from small seedlings to the largest specimens. Carefully and scientifically grown, the trees attain maximum health, hardiness and vigor. For woods planting use the fine quality small transplants offered at low prices.

Engelmann Spruce—A noble specimen for the lawn.

Engelmann
Spruce

5 to 6 feet
\$12.00 each

ENGELMANN SPRUCE

(*Picea engelmanni*)

A VERY attractive hardy evergreen tree, native from British Columbia to Mexico. The strictly pyramidal outline, with the branches closely arranged in circles and maintained to the base, makes it particularly desirable for ornamental planting.

It closely resembles the White Spruce, but is more beautiful in color and texture of foliage. Its needles, shorter and more pliant than those of the White Spruce, have a strong aromatic odor when bruised. The color ranges from green to steely-blue and is very similar to that of the Blue Spruce which it resembles in habit.

This tree, not as well-known as some of the other evergreens, is fast winning favor because of its dependability and striking color. It is safe to say that when it becomes as well known as the Colorado Blue Spruce it will exceed it in popularity. Its unusual merit and real beauty make it extremely valuable for all types of ornamental planting.

Engelmann Spruce is particularly hardy in the colder climates. It likes northern exposures, and does best in clay loam.

Use as a single specimen on the lawn or in groups alone or with other trees. You will be delighted with it.

Use White Spruce for a tall thick-growing evergreen hedge.

Use Norway Spruce for a hedge like the one illustrated. It is economical, requires less pruning than Privet and furnishes beauty and protection both winter and summer.

Norway Spruce
2 to 3 feet tall
\$2.50.

NORWAY SPRUCE

(*Picea excelsa*)

THIS vigorous sturdy evergreen grows very rapidly, forming a wide spreading conical tree up to 90 feet. As it matures the lower branches droop and sweep the ground in pleasing contrast with the ascending upper limbs. The dark green needles are thickly borne on graceful pendant whip-like branches. Though the Norway Spruce is not as long lived as other trees of the Spruce family it thrives for 40 to 60 years delighting us with its robust growth. Its

rapid rate of growth makes it extremely useful for screens and it has the additional advantage of being effective and beautiful both winter and summer.

Small Norway Spruces are very attractive and satisfactory for planting in window boxes and tubs. It stands wind, sun and exposure well. Use the 12 to 18-inch thrice transplanted grade for window boxes. These are shapely little plants and make a fine showing.

Use Little-Tree Farms several times transplanted Norway Spruce for decorative groups about the lawn, for windbreak and screen plantings and for potting. Use the once transplanted stock for valuable commercial plantings and future Christmas trees.

FOR CHRISTMAS TREES

Make your idle land profitable by growing Christmas trees. They need little care and after a short time may be harvested from year to year and sold at a good profit. Use our 4 to 8-inch once transplanted trees for this purpose. Plant them six feet apart, which requires 1200 trees per acre.

Please order by name and number.

For the large estate or farm in the open country plant a row of Norway Spruce to shelter buildings, drives and barnyard from wind and drifting snow.

*For explanation of grades see page 27.

COLORADO SPRUCES

OF ALL the evergreens native to this country, none have won greater popular favor than the Green and Blue Colorado Spruces. Their symmetry, fine color and texture, combined with their splendid health and vigor make them favorites for all types of landscape planting.

COLORADO SPRUCE

(*Picea pungens*)

MAGNIFICENT in health, vigor and hardiness, the Colorado Spruce is also one of the most strikingly beautiful and effective of all ornamental evergreens.

Pyramidal in form, as shown in the big specimens illustrated above, this Spruce is a symmetrical cone, with full-foliaged branches extending to the ground and covered with lustrous needles of varying color tones. Some trees are clear green, with no trace of blue. Others, ranging through various shades of bluish green, approach the color of the Colorado Blue Spruce. The color variations are attractive and blend well.

All Little-Tree Colorado Spruces are grown from seed of the finest quality, gathered from hardy trees in the high, cold regions of the Rocky Mountains, their native home. For this reason they can be depended on for absolute hardiness under the most trying conditions.

For ornamental plantings of all kinds, these Spruces should be used freely. They are very handsome planted singly as specimen trees about the house and lawn or along the drive, or grouped together in larger plantings on spacious lawns and through the woodlands of large estates. They grow well in all soils.

Use the several times transplanted grade for all ornamental plantings where quick effect is desired. Little-Tree Farms has the largest supply of these splendid trees in the country. Economical methods of quantity production enable us to offer them at considerably less than current prices. The small transplants are fine little plants for growing on into big ornamentals. All several times transplanted stock offered below is carefully dug with

PLANT A LIVING CHRISTMAS TREE

START one now—to grow up with your children. One of these handsome Colorado or Colorado Blue Spruces on your lawn, is a permanent investment in beauty and satisfaction.

It will increase in size and stateliness from year to year, and give untold delight to you and the whole neighborhood each Christmas season, if you but decorate it with a few colored lights at dusk. Every family should have one.

The initial cost of such a tree is small if you consider the length of time it will give you pleasure, and the size which it soon attains.

Strong color accent by the use of a few well placed Spruces gives interest to this boundary planting.

COLORADO BLUE SPRUCE

(*Picea pungens glauca*)

THIS Spruce is the bluest variant of the Colorado Spruces—the tree you mean when you ask for a “Blue Spruce.” The fine

specimens here offered have a beautiful silvery blue color. All of our trees are raised from seed of the “true blue” variety, gathered in the Rocky Mountains and are individually selected for their color.

The Blue Colorado Spruces are without peer for ornamental purposes—as lawn specimens, as accents in the garden or border planting, or in pots for formal effect at the doorway or entrance. They are at their best with a group of other conifers possessing variations of the same color tone, such as the Silver Fir or the White, Englemann and Colorado Spruces—or with a group of darker foliaged Douglas Firs, Pines or Hemlocks for contrast. To obtain best color plant in rich garden loam. The new growth each spring is brilliant blue.

Little Tree Farms has long been recognized as one of the most important sources of supply for this popular evergreen. We have shipped thousands of these beautiful trees to nurserymen and home owners. There are plenty left, ranging in size from sturdy small trees 2 to 3 feet tall to big specimens 10 feet high for immediate effect. Each tree is grown with special care and has a good bushy top and a mass of fibrous roots in a ball of native loam.

Because of its broad pyramidal shape and stiff branches the Blue Spruce is an excellent tree to use as a lawn Christmas tree. Our 7 to 10 foot trees are especially good for this purpose.

“THE CULTIVATED EVERGREENS”

By L. H. Bailey. A thorough work upon a vast subject, covering identification and description of all ornamental varieties; their selection, planting and care. \$3.00. Postage \$.15.

Mulch Recently Planted Evergreens with Peat Moss

THIS is important! Mulching with peat moss to a depth of three inches conserves moisture and prevents the roots from drying out. A peat moss mulch prevents the alternating freezing and thawing of the soil which breaks and destroys the feeding roots. Peat moss, \$4.00 per bale. 5 bales or more \$3.50 each. See page 30 for full description.

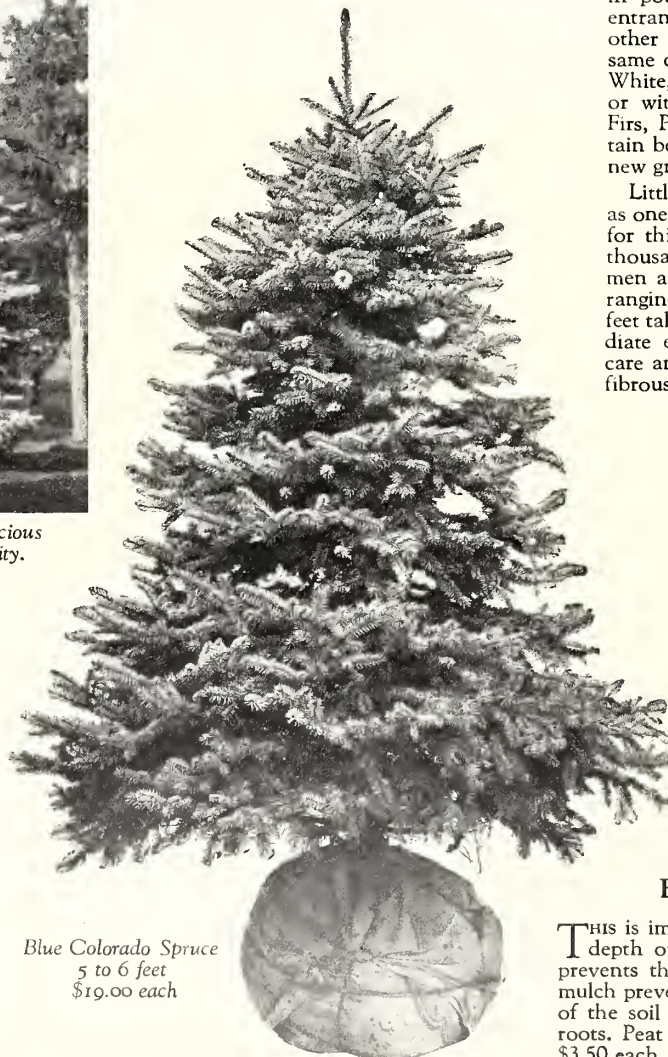

A noble specimen, deserving a spacious lawn—with room to reach maturity.

SPECIAL BLUE SPRUCES FOR MASS PLANTING

As is common in any large production there are always a few trees not quite up to standard grade, which are good trees in every way, except that they may not be as low branched or as heavy as the first quality. These trees are excellent for groups or mass plantings, where effect is desired rather than perfect individual trees. Our prices on these are one-third less than our regular price.

Not less than ten of a size sold at this special price. If packing for shipment is required add 15%.

THE PINES

(*Pinus*)

THIS group, the largest and most important of all the evergreen families contains some seventy different species. They are growing in fragrant beauty all over New England, out into the great Northwest and far down into the sunny South. Theirs are the lines that give the distinctive aspect of freedom and grandeur to our northeastern landscapes and they are, perhaps, the most characteristic evergreen of this section. Other continents have contributed some of the finest species.

The Pines, both dwarf and tall, are the most useful of all evergreens. They can be used almost anywhere for any purpose. They furnish not only the most important timber trees, but also the most valuable plant material for large ornamental groups. The Pines do not lose their beauty as they mature, but gain character and picturesque appearance.

This is the tree for adverse conditions of soil and exposure. More frequently used than any other tree for reforestation because of its commercial value and hardiness. Little Tree Farms has grown and sold millions of Pines. Our years of experience enable us to grow good trees at low prices.

Limber Pine
7 to 8 feet
\$10.00 each

Dwarf Mountain Pine
18 to 24 inches \$4.00 each

SWISS STONE PINE

(*Pinus cembra*)

A RARE semi-dwarf Alpine evergreen with exquisite deep bluish green needles, silvery below. Very similar to the White Pine but of smaller shapelier form. This is a very slow growing compact variety and will delight you with its beauty of color and texture. Use freely in ornamental plantings or in decorative groups about the house and lawn. Excellent for potting and for planting in groups about the house foundation. Small trees are ordinarily far more symmetrical and attractive than young Pines of other kinds. Shipped in New England and New York only.

LIMBER PINE

(*Pinus flexilis*)

A BEAUTIFUL soft needled Pine of wonderful color and distinct appearance. The long shimmering needles are rich blue-green, almost as blue as the Blue Spruce. Long branches reach up and out in picturesque lines. The needles surround the branchlets in a close sheath of blue-green, not fringing or spraying out, but held toward the twig with charming and unusual effect. Some groups of needles are attractively twisted or curled which gives the tree a rather Japanese effect.

Limber Pines closely resemble the White Pines and can be used in much the same way,—in the background to give variety in group plantings, for tall screens and masses and for single specimens on spacious lawns. Hardy and vigorous; these Pines are quite out of the ordinary and no planting is complete without their picturesque note. Shipped in New England and New York only.

For best results use our imported granulated peat moss in planting your evergreens. See complete information on page 30.

Our prices include packing and are f. o. b. Framingham

DWARF MOUNTAIN PINE

(*Pinus montana mughus*)

OFTEN called Mugho Pine. One of the hardiest and best dwarf evergreens, it grows slowly and forms a distinctly round and compact bush sometimes four to five feet tall and as wide, or wider. The needles keep their rich green color well during winter. In spring the plants are adorned with bright colored new shoots like tiny candles which contrast splendidly with the foliage of other evergreens. This is the best Pine for planting about building foundations and is very effective in the foreground of taller evergreens. It succeeds in almost any soil except the very wet and will stand much exposure to wind and sun. Excellent for planting at the seashore and for covering sandy slopes.

AUSTRIAN PINE

(*Pinus nigra*)

THIS hard Pine is unusually rugged and picturesque, with a wide spread of great stout branches. The stiff, straight needles, four to five inches long and borne in pairs, have a striking lustre and are of such a rich deep green color that the tree is sometimes called the "Black Pine."

Its usual form is a tall robust bushy pyramid which grows to 60 feet in height. When grown in the open the branches spread almost as wide as the tree is tall. A rapid, vigorous grower often making a foot to a foot and a half of new growth each year. The winter buds light, plump, and long, distinguish it from the Red Pine, which it closely resembles.

A splendid evergreen for city plantings, as it successfully resists gassy and smoky atmo-

spheres. Its resilient structure and vigor make it most valuable for planting under adverse conditions of sweeping winds, salt spray, poor soil and dry hilltops, both at the seashore and inland. Especially desirable for protective plantings around country and seaside homes where these conditions often prevail. Little-Tree Farms Austrian Pines are strong, sturdy, well-rooted plants.

RED PINES

(*Pinus resinosa*)

THIS magnificent evergreen, also called Norway Pine, is the most beautiful and valuable of the hard Pines. A symmetrical pyramid in youth, it forms, as it matures, a loose, open, round topped tree of picturesque appearance. The stout branches with thicker terminal clusters of rich, dark green foliage give a bold and vigorous outline to the entire tree. Grows to 70 feet tall and is one of the healthiest Pines. Easily recognized by its slender, pointed winter buds, needles 4 to 7 inches long in pairs, and its reddish bark.

RED PINES FOR MASS PLANTINGS

FOR extensive plantings of big trees such as screen or border groups along a roadside or naturalistic field and woods plantings, this grade of Red Pine is very desirable. It gives a particularly interesting naturalistic effect, and the low prices permit use in quantity.

These are excellent trees with well developed root systems and strong, vigorous tops. They differ from the regular stock only in that the branches start a little higher from the ground and the tops are not quite as symmetrical.

Though the trees of this grade are not as desirable as the first grade for use as single specimens, they make almost as fine an effect if grouped together. In fact, after several years growth there is practically no difference between the appearance of the two grades.

FOR FOREST PLANTING

THERE is no finer nor more economical evergreen to use as a cover for waste land. At small expense one can convert it into an evergreen woodland. These trees are not balled and burlapped, so should be planted when the ground is moist. Early spring and early fall are the best times to move them. Note the finely developed root system on the twice-transplanted 2 to 3 foot tree pictured to the right. This is an all-important factor for the success of plantings made under adverse conditions.

Little-Tree White Pines are grown from selected northern seed and the plants are expertly cared for so that they become fine full foliaged specimens like those illustrated here.

WHITE PINE

(*Pinus strobus*)

FOR sheer beauty there is no tree like the White Pine. Call it majestic, graceful, rugged, the "Living Glory of New England," assemble all the superlatives of Song and Story; name it with the poets, "The King of Trees," these are feeble descriptions of its glorious perfection.

Plant White Pine for the exquisite grace of its soft foliaged horizontal branches, the marvelous beauty of its outline against the sky and the comfortable feeling of seclusion its thick branches afford. Revel in its coolness and charm in summer; bless the protection it gives from snow and winds.

You have seen it gloriously green under winter's snow, heard it singing in the changing wind; smelled its cool fragrance in the heat of summer. Perhaps you've envied the owner of Pine forests. Yet everyone who owns even a small piece of land may plant and enjoy the beauty of this evergreen.

Its rich fragrance, its lovely, soft density in youth, and its deep, clear color make it the most appreciated of all evergreens for garden backgrounds, home groves and plantings along drive and path.

White Pine
7 to 8 feet
\$11.00 each

Nature has given White Pine the capacity to grow lustily and adapt itself harmoniously to a wide variety of man-made conditions. In partial shade or burning sun, at dry windswept corners, on steep banks, it has learned to survive without pampering. Rapid growing and hardy, it is one of the best commercial trees for New England and is widely used for reforestation and for ornamental pleasure woods planting.

Infinitely varied are the uses of White Pine. Plant a specimen on your lawn and know the White Pine more intimately. Enjoy its soft silvery green color and spreading low-flung branches; spangle it with lights when Christmas comes; use its sprays for decoration; make an outdoor sitting room under its shade and breathe its health-giving odor.

For a compact screen or hedge, for privacy in background or to shut out objectionable views, nothing is better than our low-branched bushy White Pines. They will plant out a highway and give welcome shelter from noise and wind.

Our prices include packing and are f. o. b. Framingham, except as noted.

White Pines for Quality Planting
7 to 8 feet \$65.00 for 10

Use this special grade at low prices wherever group effects rather than individual specimens are required.

Little-Tree Farms has for years catered to the trade of large users of White Pine. Economical production makes possible these prices.

Our prices include packing and are f. o. b. Framingham except as noted

Scotch Pine
4 to 5 feet
\$5.00 each

Lusty Scotch Pines make satisfactory windbreaks along the shore and prevent washing of the soil.

SCOTCH PINE

(*Pinus sylvestris*)

A VIGOROUS fast-growing European Pine with short blue-green needles. Reaches 60 feet. It is rugged and hardy, adapted to the most difficult conditions of soil, climate and trying exposure.

Full foliated when young, the Scotch Pine tends with age to adopt an artistic irregularity of outline that is the delight of the landscape gardener. Especially good for wind or snowbreaks and protective plantings on poor dry soil and in exposed locations. At home on barren hilltops and at the seashore.

Recommended highly for utility and woods planting in poor soils. To give your estate a picturesque loveliness plant with your Scotch Pines a few Red or White Pines and Douglas Fir.

For finest decorative plantings use the several times transplanted quality. For large utility plantings, use the once transplanted grades.

THE YEW

(*Taxus*)

ARISTOCRAT among all evergreens is the Yew, one of the oldest, toughest, longest-living trees known to man. The foliage is typically dark, almost black, with a silky waxy sheen that gives a peculiarly rich effect.

Comparatively slow growing as well as long lived, it is particularly valuable for permanent planting. Wherever evergreens must be kept within narrow bounds Yews are ideal.

Japanese Yew
18 to 24 inches
\$5.00 each

Dwarf Japanese Yew
12 to 18 inches \$5.00 each

JAPANESE YEW

(*Taxus cuspidata*)

A VERY fine Yew of spreading form which grows broad rather than tall. This variety has been grown and valued for hundreds of years in the gardens of Japan. Long lived and readily adapted to a wide variety of uses, there is no better evergreen for foundation planting, for the small lot, for the formal garden and for cemetery planting.

The Yews are all remarkably resistant to adverse city conditions, and can be depended on to grow even in shade, where many other evergreens fail. It shears readily to any shape desired and makes a handsome hedge.

Yew foliage and scarlet fruit.

DWARF JAPANESE YEW

(*Taxus cuspidata nana*)

A SMALLER, slower growing form of the Japanese Yew with a decidedly Japanese shape and velvety dark green needles. The foliage is borne more thickly, giving a particularly rich appearance. Its free irregular growth is picturesque and charming. Readily sheared to a compact formal shape. Ideal for gardens, rock gardens and foundation plantings.

6 SPLENDID ARBORVITAE

OFFER Y-7 \$14.50
(Regular Price \$18.00)

1 American Arborvitae	3 to 4 feet
1 Pyramidal Arborvitae	2 to 3 feet
1 Siberian Arborvitae	2 to 3 feet
1 Woodward Arborvitae	18 to 24 inches
1 Hovey Arborvitae	12 to 18 inches
1 Globe Arborvitae	12 to 18 inches

THE ARBORVITAE (Thuja)

MOST frequently planted of all evergreens is the Arborvitae or "Tree of Life." Its beautiful bright green color combined with its longevity makes this name particularly fitting.

The foliage, lacy and scale-like with the branchlets arranged in flat, overlapping horizontal sprays, has a pleasant aromatic odor.

From the American type have been developed some fifty different hardy garden forms, varying in character and size from tall narrow pyramids to the low broad globes. The best varieties for this climate are offered here.

AMERICAN ARBORVITAE (Thuja occidentalis)

THIS truly royal variety is one of the best known and most loved of all the evergreens. It was extensively planted by our grandfathers, who found it easy to grow well without special skill or attention.

A typical block of handsome, shapely Arborvitae at Little Tree Farms.

*For explanation of term, see page 27

Clipped *Arborvitae* make interesting garden accents.

(*Thuja occidentalis*—continued)

It is a native of this country and perfectly hardy as far north as Canada. The shape of the tree varies from a plump rounded spire with broad base to a slim pyramid. The flat, lacy sprays of foliage have a tendency to stand vertically, instead of horizontally, a characteristic shared by few other species. The foliage is compact and of fresh bright-green color. In winter the color sometimes changes to a dull brownish green.

Many fine old trees in our New England countryside bear witness not only to the long life and great beauty of *Arborvitae*, but also to their suitability for planting as lawn specimens in thick hedges or sheltering backgrounds or as accents in the garden—the very same purposes for which they are planted today. Healthy and vigorous, this handsome evergreen can be depended upon under a variety of artificial conditions. It is a favorite for great gardens and spacious grounds, and for little gardens and modest house lots where it is readily kept within bounds by pruning.

The lightest of shearing or shaping tends to thicken the new growth and brings *Arborvitae* to the absolute symmetry desirable in the formal garden. Left unsheared it is attractive for informal types of planting and frequently takes a pleasing irregularity of outline as it matures.

Arborvitae will thrive in almost any situation. It is not particular as to soil and succeeds even in moist locations and partial shade, although it does best in full sun, somewhat protected from strong winter winds.

18 to 24 inches	2.50	20.00

Globe
Arboret
18 to 24 inches
\$3.50 each

GLOBE ARBORVITAE

(*Thuja occidentalis globosa*)

THESE perfect little globes of deep green are naturally compact and well formed and ordinarily require no pruning to keep their symmetry of shape. Fairly slow growing and about 3 feet tall at maturity.

Excellent for low foreground, for foundation groups or potting. One of the oldest and most popular forms. Makes a splendid low hedge requiring little attention. One of the best and hardiest of the globe forms. Stands the winters well.

*THRICE TRANSPLANTED B & B

18 to 24 inches
\$2.50 each

HOVEY ARBORVITAE

(*Thuja occidentalis hoveyi*)

A BRIGHTER, lighter golden green in color, the Hovey Arborvitae is a gem among the green globe forms. The foliage is carried in flat vertical sprays, quite distinct from and a little more flat and open than that of the other species. Grows a little taller than the Globe Arborvitae, and is much used for planting in front of taller forms in the border and in foundation planting.

*THRICE TRANSPLANTED B & B

Height	Each	10	100

Arboret
3 to 4 feet
\$6.00 each

PYRAMIDAL ARBORVITAE

(*Thuja occidentalis pyramidalis*)

A TALL, slender evergreen, the very narrowest of all, often twenty feet tall and but two or three feet wide at the base. The foliage is denser than that of the American form and a richer green and holds its color better in winter. Prefers sun. Excellent for tall accent or to emphasize height or contrast in the garden design, or in pairs at entrance or gate.

12 to 18 inches	3.00	25.00	200.00

CANADA HEMLOCK

(*Tsuga canadensis*)

Canada Hemlock

3 to 4 feet
\$5.50 each

A WONDERFULLY graceful evergreen is this "lady of our woods" with wide spreading, drooping boughs that sweep the ground. It forms an irregular pyramid 60 feet tall. The needles of rich, dark green, lined with silver, are short and blunt and are carried horizontally on slender branchlets, giving the entire tree the lightness and charm peculiar to this species.

Hemlock thrives naturally in semi-shade, on northerly slopes and in cold damp gorges. It prefers damp rich soil and partial shelter from the high winds and hot sun of late winter. Often a first choice for woodland plantings, for shady corners with northerly exposure and underplanting among other trees.

Responds readily to shearing, quickly becomes dense and compact, and can be kept within bounds. Much used for hedges. One of the most satisfactory evergreens for small lawns. Content with sun part of the day.

*THRICE TRANSPLANTED B & B

Height	Each	10	100
3 to 4 feet	\$5.50	\$50.00	\$450.00

12 to 18 inches	2.00	15.00	125.00

Most beautiful of all evergreens in winter.

Notes on the Selection, Planting and Care of Evergreens

Selection

SELECT evergreens to fit soils and situations. For most soils all species catalogued are suitable. On light sandy land use Ground Juniper, White, Red, Scotch and Austrian Pine. Heavy muck lands grow Arborvitae and Japanese Yew well. Near seashores plant Scotch and Austrian Pine.

For badly windswept locations specify Scotch Pine, Douglas Fir and Juniper. In shade Hemlock. In partial shade Hemlock, Douglas Fir, White and Red Pine. Under city conditions Douglas Fir, Pfitzer Juniper and Japanese Yew are best.

In foundation planting all except White, Red, Scotch, Austrian, Lumber Pines and Blue Spruce. For accents and formal effects the narrow columnar shape of Red Cedar, Arborvitae and Irish Juniper. Wider upright trees are White Fir, Douglas Fir, Spruces and Hemlock. For middle heights use the various Cypresses, Hemlock and Japanese Yew. The low growers are Creeping, Pfitzer and Savin Juniper, Yews, Mugho Pine and Globe Arborvitae.

Planting

THIS is a simple operation and nearly always successful, if a few rules are followed. Dig the hole wider and deeper than the spread of the roots. Take off the burlap. Fill under and around the plant with good soil mixed with one-third peat moss. Pack very firmly. During the operation thoroughly saturate the soil allowing the water to be absorbed before firming. A three-foot tree requires four to five pails. About each plant leave a four-inch depression as wide as the spread of its branches to aid in subsequent waterings.

Mulch three inches deep with peat moss. Don't neglect to use peat moss when planting. Evergreens love it and we cannot be too emphatic about the benefits derived from its use. Saturate once each week during the first month and every two weeks thereafter. Superficial watering is not enough. Saturate thoroughly every fall. If plants are growing taller than desired, they may be kept down by breaking off the terminal bud each year. Side branches may be treated in the same way. If in doubt, ask us.

Explanation of Grades

*ONCE transplanted: Little evergreens are grown as seedlings for two or more years in the beds where they were sown. Then transplanted to fresh soil and given plenty of room to develop for another two years, they become "once transplanted" grade. At this time both roots and tops are thoroughly pruned to force heavier, compacter growth.

*Twice transplanted: After being pruned, moved a second time and thoroughly cultivated for another two-year period, the trees are graduated to "twice transplanted."

*Several times transplanted B & B: By the time this transplanting and pruning process has been repeated three or more times the evergreen is well formed, big-rooted, compact and vigorous, ready for a permanent home. Several times transplanted trees are all shipped "B & B" which means they have a good ball of earth around the roots securely tied in burlap so that the roots will not be disturbed by moving.

BOOKS ON EVERGREENS

"Evergreens for The Small Place"

By F. F. Rockwell. A handy book for the beginner, telling how to select, arrange and care for evergreens. Full of practical, straight-to-the-point information.

A real investment in better results for anyone who plants evergreens. Just the brief, practical information you need. \$1.00. Postage \$.15.

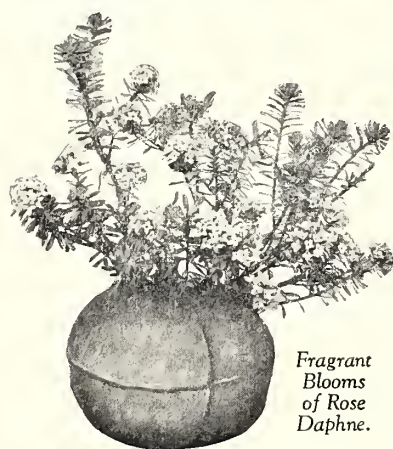

"The Cultivated Evergreens"

By L. H. Bailey. A complete book of scientific accurate information for all who would know of Evergreens well. Tells how to use, plant and care for them, how to control insects and diseases and how to identify all species and varieties. 434 pages, 163 illustrations. \$3.00 Postage \$.15.

Mountain Laurel, a billowy sea of pink bloom at the Arboretum.

Fragrant
Blooms
of Rose
Daphne.

Daphne cneorum

ROSE DAPHNE

A charming little evergreen prized for its deliciously fragrant rose-pink flowers. Blooms profusely in June and more sparsely throughout the summer. Grows about one foot tall and has fine light green foliage. Particularly good in rock gardens and foundation plantings. Plant in protected places using Peat Moss in the soil.

Height	Each	10	100
8 to 12 inches *B & B	\$1.50	\$13.50	\$125.00

Euonymus radicans

SMALL LEAF WINTERCREEPER

A delightful low-spreading or trailing evergreen with small leaves. Suitable for the north side of buildings and for shady places under trees. Does well in full sun, too. Perfectly hardy and one of the prettiest evergreens for the rock garden or for edging and filling the bare spots between newly planted evergreens. Clings very closely to any rough surface.

Spread	Each	10	100
12 to 18 inches	\$1.00	\$9.00	\$85.00

Euonymus radicans carrieri

GLOSSY WINTERCREEPER

A low rounding shrub type, not a climber, with spreading branches and beautiful shiny green leaves. This variety makes a fine low bush for planting near the front door, bordering walk or steps, and is frequently used in place of Box for edging. Readily trained to a dense even shape.

Spread	Each	10	100
12 to 18 inches	\$1.50	\$13.50	\$125.00

LITTLE-TREE EVERGREEN SHRUBS

A MOST valuable group of large and small shrubs characterized by broad green leaves which remain throughout the winter. Many of them flower or fruit profusely and the glossy foliage and bright blossoms or berries contrast pleasingly with the more sombre coniferous evergreens. Most of the shrubs prefer acid soil and some shade. Mix granulated Peat Moss, described on page 30, with the soil in planting and use, also, as a mulch.

Foliage and
Fruit of Bigleaf
Wintercreeper.

Use Small Leaf Wintercreeper as a vine. It will cling to any rough surface.

Euonymus radicans variegata

VARIEGATED WINTERCREEPER

A striking small-leaved form with narrow and interesting dark green leaves marked by a broad margin of white. Very decorative among other evergreens in foundation and border plantings. Useful for color contrast and variety in shady places and for winter effect.

Spread	Each	10	100
8 to 12 inches	\$.75	\$6.50	\$60.00

*For explanation of grades see page 27.

Euonymus radicans vegetus

BIGLEAF WINTERCREEPER

The Evergreen Bittersweet, which flowers and fruits freely. The small inconspicuous clusters of white flowers are followed by brilliant orange-yellow berries in the fall, very similar to our American Bittersweet, and particularly handsome among the glossy green foliage. The most bushy and vigorous of all Wintercreepers with handsome, large, round leaves. It clings to any rough surface and is splendid for covering wood, brick and stone walls or foundations. Frequently used to cover trunks of trees.

Spread	Each	10	100
12 to 18 inches	\$1.50	\$13.50	\$125.00
8 to 12 inches	1.00	8.00	70.00

Kalmia latifolia MOUNTAIN LAUREL

One of the finest and most decorative of our American shrubs. The illustration above shows a broad border of Laurel on the north slope of Hemlock Hill in the Arnold Arboretum, near Boston.

The shining foliage and bright blooms of the Mountain Laurel contrast pleasingly with the more sombre tones of the coniferous evergreens.

The long narrow leaves are smooth and glossy and are much used for winter decoration. Abundant large clusters of beautiful white or rose-tinged flowers appear in June. A splendid shrub of medium size for sunny and shady places, foundation planting, paths, drives and open woods. Requires a well-drained acid soil.

Height	Each	10	100
2 to 3 feet *B & B	\$4.00	\$35.00	\$325.00
18 to 24 inches *B & B	3.00	25.00	225.00
12 to 18 inches *B & B	2.00	17.50	150.00

Leucothoe catesbaei

DROOPING LEUCOTHOE

An exquisite small shrub with arching sprays of shiny, dark green pointed leaves. White flowers in June. Foliage turns bronze and claret shades in fall. Perfectly at home along brooks in damp cool shade or in partially shaded places and Rhododendron plantings.

Height	Each	10	100
15 to 18 inches *B & B	\$2.50	\$22.50	\$200.00
12 to 15 inches *B & B	2.00	18.00	165.00

Pachysandra terminalis

JAPANESE PACHYSANDRA

This little evergreen spreads from underground roots and the foliage forms a dense carpet, six to ten inches high. A fine ground cover in shade under big trees where grass will not grow. Plant 6 to 12 inches apart.

Grade	Each	10	100
2 year	\$.25	\$1.75	\$15.00

Mountain
Audromeda

12 to 18 inches
\$3.00 each

Pieris floribunda

MOUNTAIN ANDROMEDA

A very hardy shrub which opens its small, white, bell-like blossoms at the first signs of spring. Sometimes called "Lily-of-the-Valley Shrub." Forms a low, broad, dainty bush with small, shining, deep green leaves. The flower buds form in the fall and are very decorative through the winter.

Height	Each	10	100
12 to 18 inches *B & B	\$3.00	\$27.00	\$250.00

Yucca or Adam's Needle.

Vinca minor

PERIWINKLE

The Blue or Trailing Myrtle. A hardy evergreen ground cover with lilac-blue flowers and good foliage. It endures shade. Use one plant to each square foot of surface.

Grade	Each	10	100
2 year	\$.25	\$2.00	\$15.00

Yucca filamentosa

YUCCA

Also known as Adam's Needle and Spanish Bayonet. Tall wide pillars of creamy bells rise from rosettes of evergreen leaves. Striking in the foreground of evergreen plantings, in bold clumps among the shrubbery or accenting the perennial garden. Fragrant.

Grade	Each	10	100
Large Clumps *B & B	\$2.00	\$15.00	\$125.00
4 year	.50	4.00	30.00

RHODODENDRONS

Rhododendron

THIS group is characterized by broad evergreen leaves, and large clusters of handsome big flowers in June and July. By nature the Rhododendrons are woodland plants, delighting in situations screened from the morning sun and from cold cutting winds in late winter. They love partial shade and acid soil. The roots, which are very near the surface, should be kept cool and damp and never allowed to dry out. For this reason, a moist porous soil, fairly rich in leaf mold, humus or peat is ideal, and a mulch of leaves or peat moss (see page 30) is extremely beneficial.

Rhododendrons are used along drives and paths, for massing and underplanting in woods and for shady places, such as the north sides of buildings. Rhododendrons, Catawba and Caroliniana, can be used in full sun.

Rhododendron carolinianum

CAROLINA RHODODENDRON

A very choice hardy Rhododendron of rather dwarf habit, forming a shapely bush up to 6 feet tall. The leaves are rich glossy green and much smaller than those of the other species. A tough and vigorous plant under most conditions. Large rose-pink flowers open earlier than the blossoms of the Catawba and Rosebay. A gem for rock gardens or planting about foundations.

Height	Each	10	100
2 to 3 feet *B & B	\$5.50	\$50.00	\$450.00

A Rhododendron Border Planting in Full Bloom. (Insert) Flowers of Mountain Laurel.

Our prices include packing and are f. o. b. Framingham

Catawba
Rhododendron

2 to 3 feet
\$5.00 each

CATAWBA RHODODENDRON

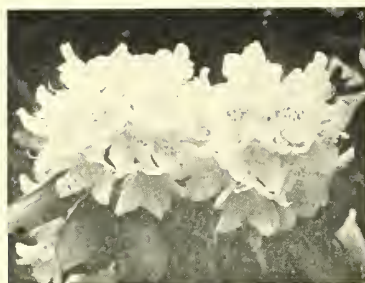

(*Rhododendron catawbiense*)

EXTREMELY popular is this handsome Rhododendron, of medium size. It forms a compact shrub, broad rather than tall, reaching a maximum height of six feet.

The long, round tipped leaves are rich, lustrous dark green and free from rust. It flowers in June, with great round clusters of rosy pink to lavender blossoms. This is a very free bloomer and the hardiest of all the Rhododendron family. It will withstand exposure where other varieties fail. Grows in sun or shade.

The Catawba Rhododendron grows wild on the mountain sides of our southern states from Virginia to Georgia. It is one of the shrubs best adapted for foundation planting, shady corners, and massing in large groups. Its color of leaf and flower, its compactness of growth and sturdy texture, as well as its hardiness, make this a splendid shrub for general use.

Height	Each	10	100
3 to 4 feet *B&B	\$7.00	\$62.50	\$575.00
2 to 3 feet *B&B	5.00	45.00	400.00
18 to 24 inches *B&B	3.50	32.50	300.00

Immense flower heads of the Rhododendrons frequently measure 7 to 10 inches across.

PEAT MOSS

PEAT moss, a highly absorbent, moisture retaining material, weed and fungus free contributes to the humus forming qualities in the soil, a true acid peat and a native soil element for all evergreens. Ours is the finest quality sphagnum peat and capable of absorbing ten to fifteen times its own weight in moisture.

Peat moss should be used in the planting of every evergreen. In ordinary soils use one-third peat moss and two-thirds soil by volume, mixing the soil and peat moss thoroughly.

Mulch all evergreen plantings three inches deep with peat moss. As a mulch it conserves moisture; prevents freezing and thawing of the soil, which breaks and destroys feeding roots; keeps down weed growth; and improves the appearance of the evergreen beds. It has no odor and is clean to handle. Leave the peat moss on the beds winter and summer. Buds come up through it.

Peat moss is by far the best all-around mulch for evergreens on the market today. Mix one bale with the soil in planting every fifteen evergreens from two to five feet tall.

We offer fine quality imported moss, compressed in bales of approximately 180 pounds (varies with atmospheric conditions). As a mulch one bale covers 80 square feet three inches deep.

Standard bale, each	\$4.00
In quantities of 5 or more, each	3.50
Trial package, about 1/4 bale, each	1.50

Express or freight collect.

Rosebay
Rhododendron

3 to 4 feet
\$6.50 each

ROSEBAY RHODODENDRON

(*Rhododendron maximum*)

THE Rosebay or Great Laurel, native in the woodlands of northeastern United States, is the largest of the Rhododendrons, often reaching a height of fifteen feet. Perfectly hardy, its tall spreading form is covered with broad, tough, pointed leaves, green all the year round.

In late June and July it bears many clusters of blossoms often measuring eight to ten inches across. The color of the flowers varies from white to delicate shades of flesh pink.

This shrub is excellent to use for massing, for a tall screen of shrubbery, for bordering drive or path in the woods. A bank covered with these hardy large growing members of the Rhododendron family gives pleasure throughout the entire year. In winter the very broad leaves hold the snow and the white laden branches are extremely effective. It will thrive in semi-shade or partially exposed positions, where the soil is naturally cool and damp. Do not plant in full sun.

Height	Each	10	100
4 to 5 feet *B&B	\$9.00	\$85.00	\$800.00
3 to 4 feet *B&B	6.50	60.00	550.00

UNUSUAL SHRUBS You Should Know

HYBRID LILACS

(*Syringa*)

ARISTOCRATIC descendants of the Common Lilac everybody knows and loves, noted for their fragrance, size and the perfection of their flowers. They bloom while young, often the same year they are planted.

Single Varieties

CONGO. Beautiful large trusses of deep, lively red bloom.
3 to 4 feet tall \$3.00 each

LUDWIG SPAETH. A splendid deep purplish red, earlier than Congo.
2 to 3 feet tall \$1.50 each

LUCIE BALTET. Large, open pink clusters. Very lovely. An unusual color, effective with other varieties.
3 to 4 feet tall \$2.00 each

Double Varieties

PRESIDENT GREVY. Large, pale blue.
2 to 3 feet tall \$1.50 each

PRESIDENT CARNOT. Pinkish buds, pale blue blooms, tinged pink.
2 to 3 feet tall \$1.50 each

MME. LEMOINE. Large, ivory white.
2 to 3 feet tall \$1.50 each

MME. CASIMIR PERIER. Dense clusters of yellow buds expand to pure white.
18 to 24 inches tall \$1.25 each

Double Lilac

Hybrid Mockorange Virginal

HYBRID MOCKORANGES

(*Philadelphus*)

ANEW race of plants given us by that peerless French hybridist, Lemoine. Flower very freely in June and often sparingly throughout the summer. All have snow white flowers and are fragrant.

Low growing shrubs with many slender arching stems

AVALANCHE. Many single, snowy white flowers.

ALBATRE. A fine double white.

***FAVORITE.** Profuse, somewhat smaller single flowers.

2 to 3 feet tall \$.75 each, except those starred *\$1.00 each

Medium tall shrubs of vigorous, erect habit

BANNIERE. A large double form.

GLACIER. Single blooms thickly cover the branches like snow.

***VIRGINAL.** Many immense double blooms 1½ to 2 inches across.

Fragrant Viburnum

MAYFLOWER VIBURNUM

(*Viburnum carlesi*)

ATRULY wonderful new medium sized shrub from Korea, prized for its exquisite fragrance similar to that of the Trailing Arbutus. The waxy flower clusters, pink in bud, pure white when open, appear early in the spring. Thrives under most usual conditions, but does best in partial shade and cool, moist soil. A charming plant for the foreground of the border or in planting about the house.

18 to 24 inch plants \$3.00 each.

NANKING CHERRY

(*Prunus tomentosa*)

AN EXTREMELY ornamental spreading shrub or small tree covered in early spring with clouds of bloom. The tiny flowers, pink in bud, open to pure white and their contrast with the bright red flower stalks and calyx is very striking. The short stalked, cherry-like scarlet fruit ripens in June and is both decorative and palatable. The Nanking Cherry comes from northern China and Manchuria and is perfectly hardy here. It thrives best in full sun and well drained soil. Use it in the background of the mixed shrub border or alone.

2 to 3 feet tall \$.75 each.

Nanking Cherry

UNUSUAL PLANTS YOU SHOULD KNOW

Fringed Gentian

FRINGED GENTIAN

(*Gentiana crinita*)

Most beautiful and vivid of all the blue wild flowers is this true Fringed Gentian, now rarely found among the swampy meadows of New England. To one who has gathered the exquisite flowers of intense deep sky-blue in early autumn the sight must ever recall pleasant memories. It is commonly supposed that this rare Fringed Gentian is impossible of cultivation. It is strictly speaking a biennial, but in favorable locations where it is always moist, though not wet, it sows itself so as to reproduce continuously. The first season the plants are very tiny and should not be overlooked, but the second year start to grow rapidly. If the plants are pinched back before budding, they will produce more flowers.

1 year old pot plant \$.50 each.

Hardy Cactus

HARDY CACTUS

(*Opuntia vulgaris*)

This really hardy Cactus is a most interesting and odd plant with thick succulent leaves, fringed with curious spines. It grows naturally in the extremely poor arid sandy soils of the desert. It survives in dry rock crevices, where it forms veils and festoons on the sides of cliffs. In summer it bears large yellow flowers formed by numbers of narrow petals and is a gorgeous sight. Absolutely hardy and easy to grow in well drained places. An excellent plant for rock garden—crevices and walls rather than for the garden border.

Small plants \$.35 each.

Chrysanthemums for fall color

HARDY CHRYSANTHEMUM

This trio, the most dependable of all the hardy Chrysanthemums almost never fails to produce gorgeous flowers before hard freezing weather cuts them down. In our experience they have never winter killed in New England. For more beautiful and surer bloom, plant them in the sun, in the shelter of large shrubs or against buildings where they will have some protection from frost. All are of strong growth and grow about 3 feet tall.

Autumn Glow	rich deep rose pink
Autumn Queen	glistening snow white
Autumn Gold	brilliant golden yellow

Small plants \$.35 each; \$2.50 for 10.

Lavender Phlox Caroline Vandenberg

5 NEW PHLOX OF MERIT

BLUE MOSS PHLOX—GEORGE WEST. A new and very valuable creeping Phlox subulata of superior blue color. Vigorous. Quickly produce large mats smothered with bloom in early May.

MISS VERBOOM—A new clear rose-pink variety of the Miss Lingard type with a handsome large conical truss of bloom. Flowers a month earlier in June or July. One of the very best new varieties.

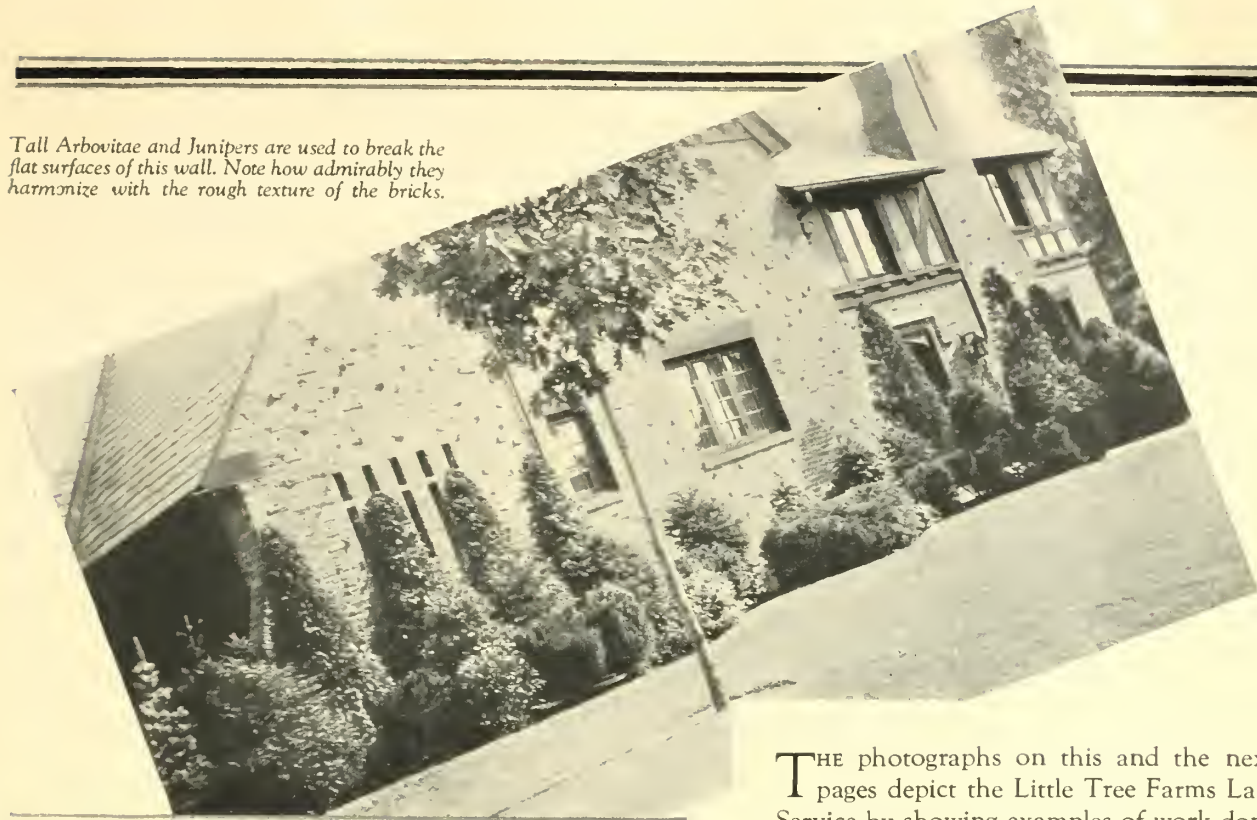

CAROLINE VANDENBERG—For midsummer bloom of a new color. Immense broad trusses of true lavender blue flowers, most unusual and striking. Flowers very profusely.

KARL FORSTER—Glowing dark orange-red. Individual flowers large and of good substance. New in this country.

MRS. W. VAN BENNINGEN—A robust grower of medium height with extra large flowers of rich salmon red. Free and persistent bloomer.

2 year plants \$.50 each; \$4.50 for 10.

Tall *Arbovitae* and *Junipers* are used to break the flat surfaces of this wall. Note how admirably they harmonize with the rough texture of the bricks.

THE photographs on this and the next three pages depict the Little Tree Farms Landscape Service by showing examples of work done by us on our client's properties and illustrate the fact that the larger evergreens are in many cases the most desirable and economical material to use in working out a landscape problem.

We emphasize the word "economical" because in the past some customers though convinced of the desirability of the larger sizes, have felt that the cost would be prohibitive, and have tried to content themselves with smaller evergreens inadequate for the purposes for which they were employed. This is a mistake. Although there is a certain relation between size and cost, a careful examination of our price lists will convince you that the cost of the sizes ranging from four to ten feet is less in proportion than that of those ranging from one to four feet, despite the fact that many of the larger specimens have actually been transplanted and root pruned five or six times.

Here a group of Spruces, Junipers and other evergreens masks the monotonous surface of a wall and is a charming background for a low border of flowers.

The simplest way to transport large evergreens is by truck or gondola car. Above is a shipment being transferred from a Little Tree Farms' truck to a car.

The stately portico demands a dignified approach. Here larger evergreens give the proper effect.

EVERGREENS, like children, require more care and attention in the nursery and are more likely to suffer from accidents and unfavorable conditions when they are little than when they grow up. This is the reason for comparatively low prices on the larger evergreens.

One should bear in mind, too, that it takes fewer of the larger sized plants to produce a given effect, and also that you may get this effect almost at once without the necessity of waiting for years, and the expenditure of considerable time, energy and money for their care and cultivation. One larger evergreen often takes the place of two or three smaller ones, and costs less. In fact, the question simmers down to whether it is cheaper in the end to try to raise the plants yourself, undertaking the care and risks involved, or to let the nursery do it for you. We find the argument all in favor of letting the nursery do the hard work.

Left: The formally shaped evergreens lend charm to this terrace and accent the horizontal lines of the house.

A border of mixed evergreens is a splendid screen for the garage courtyard.

*Groups of large and small evergreens guide one up this pathway to the house
Note the picturesque sky-line of the native Pines in the background.*

LITTLE-TREE FARMS is particularly fortunate in being able to offer its customers at this time, when the larger evergreens are very scarce, an important collection of prime, first grade plants in a number of very desirable varieties and in sizes ranging up to twelve feet tall. In addition to these fine specimen plants, there are offered large numbers of big evergreens which, due to some irregularity of growth or form, are not suitable for planting as single specimens, but are quite as desirable for mass or group plantings. These may be purchased at even lower prices than the specimen quality. For complete information as to sizes, prices and varieties, we refer you to pages 5 to 27 of the catalog.

The demand for this stock is constantly increasing. When it is gone replacement cannot be made for years because of the relatively slow growth of evergreens. We suggest, therefore, an early selection from these lists.

*Below. Often banks present a problem.
Here one is treated very effectively.*

*Right. Little Tree Farms Service shifting
a 30 foot Hemlock to a better location.*

*Here a planting of large White
Pines and Rhododendrons is a
sufficient barrier against intrusion.*

These larger evergreens are in keeping with the scale of this house and its surroundings.

IN THIS and the past three pages we have shown typical examples of the use of the larger evergreens to illustrate their desirability where immediate effects are required. Home owners who purchase these larger plants repeatedly express their satisfaction with results. Real estate operators frequently tell us that their houses sell faster if surrounded by plantings of the larger evergreens.

Many of you have some special problems not fully covered by these examples or suggestions. We invite your inquiries. A complete landscaping and forestry service is offered to our clients. This service, efficient in operation, reasonable in cost, and satisfactory in results is available to anyone interested in any type of landscape or forest development. Let us tell you how this service may help you.

Left. Here tall White Pines define the boundary yet permit free passage of light and air.

Below. A border planting of Spruces and Pines, full of pleasant contrasts.

Leaves and
fruit of
White Ash

LITTLE TREE DECIDUOUS TREES

GROWN with greatest care, from the best seed obtainable. Favorable soil and climate and constant attention produce lusty, well-rooted plants, ready to grow into handsome big trees. All these are several times transplanted quality, except as noted.

Scarlet and
crimson
Oak Foliage

Acer dasycarpum SILVER MAPLE

A hardy fast growing shade tree with tall, oval crown. Leaves are finely cut and silvery on the underside. Very ornamental as a specimen and a splendid shade tree.

Height	Each	10	100
14 to 16 feet	\$3.50	\$30.00	\$275.00
12 to 14 feet	3.00	27.50	250.00
10 to 12 feet	2.50	22.50	200.00
8 to 10 feet	2.00	17.50	150.00

Acer platanoides NORWAY MAPLE

A large handsome tree with round spreading head of compact clean foliage. The greenish flowers in early May are quite fragrant. This is a hardwood Maple with strong firm branches that resist the wind and ice storms. Admirable for both street planting or lawn shade.

Height	Each	10
12 to 14 feet	\$6.50	\$60.00
10 to 12 feet	5.00	45.00
8 to 10 feet	3.50	32.50

Acer rubrum RED MAPLE

A tall spreading tree with oval crown bearing exquisite crimson blossoms in spring. The green foliage of summer becomes brilliant red in fall. Smooth gray bark is noticeable in the winter. A splendid lawn tree. Thrives in wet places. This is the familiar Red Maple of the New England countryside that brings the first flaming color to the autumn landscape.

Height	Each	10
12 to 14 feet	\$6.50	\$60.00
10 to 12 feet	5.00	45.00
8 to 10 feet	3.50	30.00

Acer saccharum SUGAR MAPLE

A magnificent tall shade tree of noble proportion for lawns, groves, streets and drives. Its

strong, vigorous growth, perfect health and resistance to disease make it a first choice for general planting on fine streets and avenues. Another "hard Maple" whose branches will not break in storms. The long pointed buds unfolding in the spring are unusually attractive while the leaves color rich shades of brilliant golden yellow to crimson in the fall.

Height	Each	10	100
14 to 16 feet	\$7.50	\$70.00	
12 to 14 feet	5.50	50.00	\$475.00
10 to 12 feet	4.50	40.00	375.00
8 to 10 feet	3.50	30.00	275.00

Decorative Birch catkins in early spring.

Betula alba EUROPEAN WHITE BIRCH

A beautiful, white-barked tree. Very striking. Makes a fine lawn specimen. Especially effective in contrast with evergreens such as Douglas Fir and Hemlock. The foliage, neat and small, is finely toothed and the long flowers or catkins are decorative in early spring.

Height	Each	10
6 to 8 feet	\$2.50	\$22.50

Betula alba laciniata CUTLEAF WEeping BIRCH

A graceful tree with pendulous branches and deeply serrated leaves. Exceedingly ornamental as a lawn specimen or at the water's edge.

Height	Each	10
6 to 8 feet	\$4.00	\$37.50
4 to 6 feet	3.00	27.50

Betula lenta SWEET BIRCH

Also called Cherry or Black Birch. A hardy tree with smooth shining, reddish brown, aromatic bark.

Height	Each	10
6 to 8 feet	\$2.50	\$20.00

Our prices include packing and are f. o. b. Framingham

Betula lutea YELLOW BIRCH

The golden-tinged bark is charming. A large growing, hardy tree.

Height	Each	10
6 to 8 feet	\$2.50	\$20.00

Betula papyrifera CANOE BIRCH

Loveliest of all the Birches, the best and longest lived of the White-barked varieties. The dark bark of young trees changes to glistening white as the trees mature. The familiar native Paper Birch used by the Indians.

Height	Each	10	100
8 to 10 feet	\$3.25	\$30.00	\$275.00
6 to 8 feet	2.50	22.50	200.00

The branches of Flowering Dogwood are covered with blooms just as the leaves appear.

Cornus florida FLOWERING DOGWOOD

A graceful small tree or irregular large shrub with pretty horizontal branches thickly covered with white bloom in the spring. Does well planted under other trees. Lovely for massing with evergreens, edging the woodland, lawn or border.

*TWICE TRANSPLANTED

Height	Each	10	100
3 to 4 feet *B & B	\$2.00	\$18.00	
2 to 3 feet *B & B	1.50	12.00	\$100.00

Cornus florida rubra RED FLOWERING DOGWOOD

Same as above with deep rose-colored flowers.

Height	Each	10
4 to 5 feet *B & B	\$7.50	\$70.00
2 to 3 feet *B & B	5.00	47.50

Flowering Thorn, commonly known as Hawthorn not only flowers freely but also provides a feast of fruit for winter birds.

Crataegus cordata

WASHINGTON THORN

A slender tree, up to twenty feet tall, with small shapely crown. Showy white flowers in June. Shining scarlet fruits persist through the entire winter. A great favorite with the birds. Useful for a single specimen or to mix in the shrub border.

Height	Each	10
5 to 6 feet *B & B	\$3.00	\$25.00
4 to 5 feet *B & B	2.50	20.00
3 to 4 feet *B & B	2.00	15.00

Crataegus oxycantha splendens

PAULS SCARLET THORN

A small shapely tree, up to twenty feet, with spreading crown, loaded with clusters of brilliant double flowers of exquisite carmine pink in June. Showiest of all the Hawthorns and a gem for the small lawn. The long sprays of blooms are prized for cutting. Rather slow growing, like all the Hawthorns.

Height	Each	10
4 to 5 feet *B & B	\$3.00	\$25.00
3 to 4 feet *B & B	2.50	20.00

White Ash makes a fine shade tree.

Fraxinus americana

WHITE ASH

White Ash is one of the most desirable native trees for landscape and street planting. It is a tree of much character and beauty at all stages. The trunk is peculiarly straight and smooth and the crown a magnificent oval.

Exceptionally clean and rapid growing, the Ash sometimes grows three to four feet each year. It is easily transplanted and prefers a rich, moist, loamy soil and a sunny location, but grows in any well-drained situation and is tolerant of partial shade. Very free from disease and practically immune to the gypsy moth, this tree can be transplanted safely in infested areas.

(White Ash—continued)

The leaves are carried on both sides of the stems making a fern-like spray. Their autumn color is mellow-gold tinged a bronzy-purple, which forms a striking background for the flame color of the Maples.

White Ash should be grown whenever rapid growth in young trees is desired. It is a valuable timber tree as well and produces a large volume of useful wood in a comparatively short time.

Height	Each	10	100
14 to 16 feet	\$3.50	\$30.00	\$250.00
12 to 14 feet	2.50	20.00	150.00
10 to 12 feet	2.00	17.00	125.00
8 to 10 feet	1.50	12.50	100.00
6 to 8 feet	1.25	10.00	80.00

Malus arnoldiana

ARNOLD CRAB

A small, broad, round-topped tree, with thickly tangled slender, arching or drooping branches. Considered by some the showiest and most desirable of all the Flowering Crabs, surpassing most others in size and brilliance of flowering. A mass of glorious bloom in May or June. The buds are bright rose-pink changing to white as they expand and the contrast of color is singularly beautiful. Small yellowish fruit in fall, attractive to birds.

Height	Each	10
4 to 5 feet *B & B	\$2.50	\$22.50
3 to 4 feet *B & B	2.00	17.50

Fragrant blooms of Bechtel Crab.

Malus ioensis plena

BECHTEL CRAB

A small tree, about 25 feet tall, with fine spreading crown. The large blooms, illustrated above, each two and a half inches across, double like little roses and with the delicate fragrance of violets, are freely borne in clusters transforming the tree to a mass of color. Very ornamental for the small lawn or shrub border. A most satisfactory variety to plant for quick effect, as it flowers freely while the trees are very young.

Height	Each	10
4 to 5 feet *B & B	\$2.50	\$22.50
3 to 4 feet *B & B	2.00	17.50

Malus spectabilis

CHINESE FLOWERING CRAB

The oldest known Crabapple, long cultivated by the Chinese in the Imperial palace at Peking and other old gardens. Forms a small vase-shaped tree 20 to 30 feet tall with rather stiff ascending branches and short twigs smothered with bloom. The flowers, pale pink, semi-double and fragrant, are freely borne in clusters. A tree in full bloom is a striking sight. Use as lawn specimen or in a mixed border.

Height	Each	10
2 to 3 feet *B & B	\$2.00	\$17.50

For explanation of grades see page 27.

Malus sargentii

SARGENT CRAB

A species distinct from all other flowering crabs in that it is of peculiarly dwarf spreading habit with lower branches flat on the ground. It is remarkably well suited to covering slopes and banks. Round clusters of white saucer-shaped flowers are borne in profusion followed by masses of small wine colored fruit to which the birds are very partial.

Height	Each	10
3 to 4 feet *B & B	\$2.50	\$22.50

The Tea Crab has long wands of pink bloom.

Malus theifera

TEA CRAB

A gem among small ornamental trees. Seldom over 20 feet tall with long, stiff, irregular, zigzag branches. These are thickly studded with pink blossoms from base to tip—each branch a floral plume—a glorious sight. The leaves and bark are purplish. Tiny, greenish red fruit. Considered by the late Dr. E. H. Wilson the handsomest of all the Flowering Crabs.

Height	Each
5 to 6 feet *B & B	\$4.00

Lombardy Poplar for quick screen or accent.

Populus nigra italica

LOMBARDY POPLAR

A very rapid growing narrow columnar tree, useful for quick screens or background accents. The tall slender columns of green are particularly effective bordering a formal drive or avenue. Plant 4 to 8 feet apart according to the thickness of the screens desired. Poplars should be planted in the spring.

Height	Each	10
10 to 12 feet	\$2.00	\$18.00
8 to 10 feet	1.50	12.00

Purpleleaf Plum blooms before the leaves appear.

Prunus cerasifera pissardi

PURPLELEAF PLUM

A handsome small tree or large shrub of vigorous upright growth, noted for its conspicuous foliage color. The young leaves are deep crimson as they unfold changing to rich purplish maroon which persists until autumn. Splendid for color masses or as specimens on the lawn or mixed shrub border.

Height	Each	10
5 to 6 feet	\$2.50	\$22.50
4 to 5 feet	2.00	17.50
3 to 4 feet	1.50	12.50

Quercus bicolor **SWAMP WHITE OAK**

A beautiful tall tree of striking grandeur when planted in the open. Massive trunk and stout horizontal limbs. Light gray bark. Grows as well in wet as in dry soils. Fine yellow fall color. Leaves are small and round lobed.

Height	Each	10
8 to 10 feet	\$4.00	\$35.00
6 to 8 feet	3.00	25.00

Quercus coccinea **SCARLET OAK**

There is no better Oak than this for general planting. It forms a large tree of fine proportions. The large, shining, green leaves, deeply and sharply lobed, are particularly handsome and turn to a fiery scarlet in the autumn, lighter and more brilliant in color than the Red Oak. Grows anywhere, even in dry soils and at the seashore. Remarkably free from insect pests and fungus, and is long lived, as are most of the Oaks. A splendid tree for lawn shade or for street or avenue planting. Especially valuable for its fall color.

Height	Each	10
12 to 14 feet	\$9.00	\$85.00
10 to 12 feet	7.50	70.00
8 to 10 feet	5.50	50.00

Quercus macrocarpa **MOSSYCUP OAK**

Very attractive as a shade or ornamental tree. Easy to transplant. Grows rapidly in a variety of soils. Has few insect enemies. One of the largest of American Oaks.

Height	Each	10
12 to 14 feet	\$6.50	\$60.00
10 to 12 feet	5.00	45.00

Quercus palustris

PIN OAK

A charming medium size cone shaped tree, distinguished by its straight trunk, the drooping tendency of its lower limbs and its fine, sharply pointed, deeply cut leaves. Long lived, yet a very fast grower especially in moist soils. Fall color a brilliant red. One of the easiest Oaks to transplant and deservedly a great favorite for lawn or street planting.

Height	Each	10
14 to 16 feet	\$10.00	\$90.00
12 to 14 feet	8.00	75.00

Quercus rubra

RED OAK

The best all-round Oak. Grows 80 feet and is a stately specimen for lawn or street planting. The broad, handsome leaves, (5 to 9 inches long) give splendid shade and in the fall are a rich purplish crimson. A vigorous grower, quickly developing a broad, round head. This rugged monarch grows and thrives everywhere, even at the seashore or in exposed places. A fine tree for massing in woodlands. A small grove of Red Oaks will bring wild life to an estate, for many birds delight in its shelter and the squirrels are attracted by its acorns. Easily transplanted.

Height	Each	10
14 to 16 feet	\$8.00	\$75.00
12 to 14 feet	7.00	65.00
10 to 12 feet	6.00	55.00
8 to 10 feet	4.00	35.00
6 to 8 feet	3.00	25.00

Shining red fruit of Mountain Ash.

Sorbus

MOUNTAIN ASH

A fine ornamental lawn tree with large, handsome, many pointed leaves. Grows up to thirty feet. White flowers in June. Many large showy clusters of bright orange-red berries in early fall. Conspicuous in flower and in fruit.

Height	Each	10
5 to 6 feet	\$2.00	\$18.00

Our prices include packing and are f. o. b. Framingham

Tilia americana **AMERICAN LINDEN**

A fast growing shade or lawn tree with large, round shapely crown. The greenish yellow flowers in June are very fragrant and attractive to bees. Unusually healthy and free from insects. The Lindens are much used for formal effect on lawn or avenue. Grows to 80 feet tall. Does best in moist, but well drained soils.

Height	Each	10
10 to 12 feet	\$4.50	\$40.00
8 to 10 feet	3.50	30.00

Tilia cordata

LITTLELEAF EUROPEAN LINDEN

Similar to American Linden, but smaller and slower growing with small heart-shaped leaves. Excellent for shade.

Height	Each	10
14 to 16 feet	\$7.00	\$65.00
12 to 14 feet	5.50	50.00
10 to 12 feet	4.50	40.00
8 to 10 feet	3.50	30.00

Ulmus americana

AMERICAN ELM

The Queen of native American shade trees. This high arching, graceful, towering tree is known and loved everywhere for its welcome shade and beautiful form. A long lived tree, attaining over 100 feet in height. Prefers moist, but well drained soils.

Height	Each	10
10 to 12 feet	\$4.00	\$36.00
8 to 10 feet	2.75	25.00

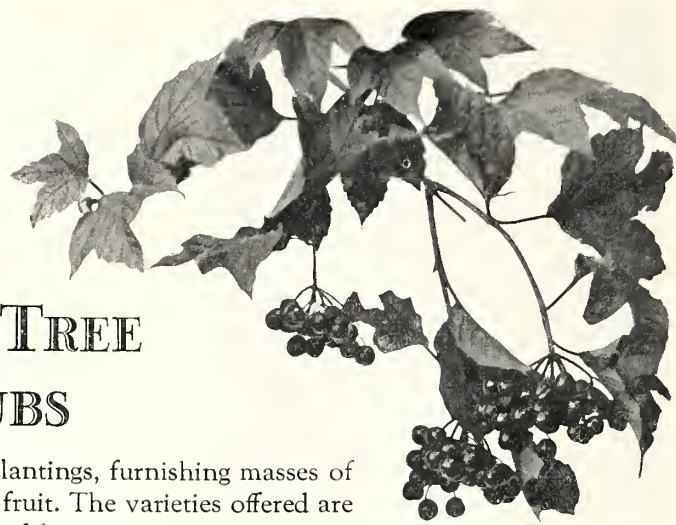

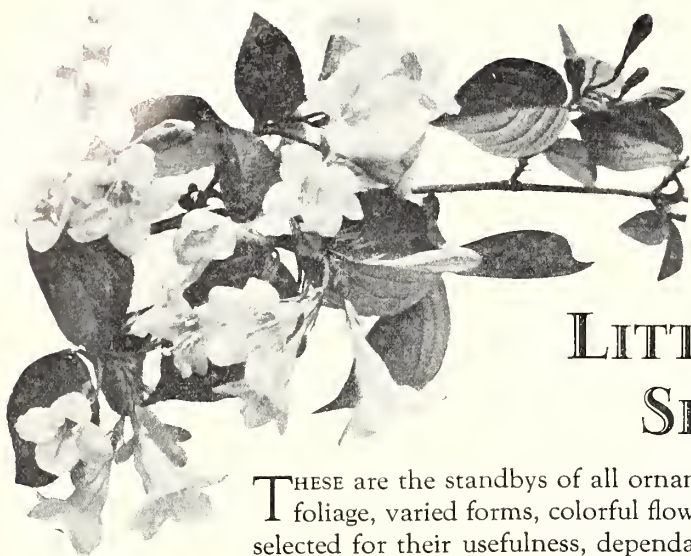

Typical Chinese Elm, four years after planting, already twenty feet tall with a spread of eighteen feet.

Ulmus pumila

CHINESE ELM

Combines the rapid growth of the Poplars with the graceful beauty and longevity of Elms. A new Elm introduced from China where for centuries it has withstood adverse conditions of soil and climate. Remarkably free from insect pests and diseases. An extremely strong and vigorous grower, giving luxurious shade in a few years. Use Chinese Elm for a quick screen or windbreak, for lawn or street planting. It has proved valuable under a greater variety of climate and soil conditions than any tree yet introduced.

Height	Each	10
6 to 8 feet	\$2.50	\$22.00
4 to 6 feet	2.00	15.00

LITTLE-TREE SHRUBS

THESE are the standbys of all ornamental plantings, furnishing masses of foliage, varied forms, colorful flowers and fruit. The varieties offered are selected for their usefulness, dependability, and beauty.

Azaleas are shipped with balls of earth, burlapped wrapped, other shrubs with roots carefully packed to keep them from drying out.

Acanthopanax pentaphyllum ARALIA

A graceful, vigorous growing shrub with arching branches and bright green foliage. The branches which are somewhat thorny and stand shearing well, make this an excellent shrub for hedges. Will thrive in shady places and on rocky banks and slopes. Does well in dry soils.

Height	Each	10	100
2 to 3 feet	\$.60	\$5.00	\$40.00

Aronia arbutifolia RED CHOKEBERRY

A splendid medium size shrub. Excellent as a filler in foundation and border plantings. Small white flowers in May. The red berries and brilliant red color in fall are particularly striking. Does best in partial shade. Use among Rhododendrons, Laurel and Azaleas.

Height	Each	10	100
2 to 3 feet	\$1.00	\$8.00	

Azalea arborescens SWEET AZALEA

A graceful hardy shrub of medium height with fragrant rose-tinted blooms in May and June. Handsome red and gold autumn coloring. Grows best in shade or partial shade and acid soil.

Height	Each	10	100
18 to 24 inches *B & B	\$3.50	\$30.00	

Azalea calendulacea FLAME AZALEA

Rightfully named—for its mass of flame-colored flowers of orange and yellow in early June. A vigorous grower, forming a broad, bushy shrub of medium height. Should be used in shrub borders, plantings about foundations and as accents in the garden. Grows in sun or shade. Striking.

Height	Each	10	100
18 to 24 inches *B & B	\$3.50	\$32.50	\$300.00

Azalea kaempferi TORCH AZALEA

One of the finest Azaleas. Lovely salmon pink blossoms. A prolific bloomer. Does well in sun or shade. Effective in foundation plantings.

Height	Each	10	100
12 to 18 inches *B & B	\$4.00	\$35.00	

Azalea viscosa SWAMP AZALEA

Particularly valuable because its fragrant white flowers tinged with rose lengthen the Azalea season into July. Thrives best in shade and wet places. Use in shaded foundation and border plantings and near streams.

Height	Each	10	100
2 to 3 feet *B & B	\$3.00	\$25.00	
12 to 18 inches *B & B	1.50	12.50	

Azaleas thrive at the water's edge. They like damp, rich acid soil and partial shade.

"THE BOOK OF SHRUBS"

By Prof. A. C. Hottes. A splendid book describing and comparing all the different shrubs and telling how to buy, plant and care for them to get the best results. \$3.00. Postage \$.15.

Our prices include packing and are f. o. b. Framingham

Berberis thunbergii JAPANESE BARBERRY

This low, dense prickly shrub is a favorite for hedges, borders or foundation plantings. A vigorous grower in ordinary soils, perfectly hardy and endures partial shade. One of the finest low shrubs. Brilliant autumn foliage and red fruits.

Height	Each	10	100
18 to 24 inches	\$.35	\$2.50	\$18.00
12 to 18 inches	.25	2.00	12.00

Buddleia davidi magnifica OXEYE BUTTERFLYBUSH

Sometimes called Summer Lilac because of the long sprays of purple flowers like lilacs during the summer. Prefers sun and does best in well drained soil. Use in mixed border plantings and as garden accents.

Height	Each	10	100
2 year	\$.60	\$5.00	

Calycanthus floridus SWEET SHRUB

An old fashioned shrub. The chocolate colored flowers bloom all summer and have a spicy strawberry odor. Does best in partial shade.

Height	Each	10	100
2 to 3 feet	\$1.00	\$8.00	\$70.00

Caragana arborescens SIBERIAN PEA-TREE

An interesting large growing upright shrub. Conspicuous pea-shaped flowers during summer. Ideal for dry situations in full sun. Use in the background of mixed shrubbery borders. Excellent for hedges and windbreaks. Very hardy.

Height	Each	10	100
4 to 5 feet	\$1.25	\$10.00	\$90.00
3 to 4 feet	.75	6.00	55.00
2 to 3 feet	.60	5.00	40.00

Clethra alnifolia SUMMER SWEET

Also known as Sweet Pepperbush. Grows to six feet. Does best in moist soil and semi-shade. Use about foundations, in mixed shrubbery borders, at edges of streams and ponds. Foliage splendid green and persistent. Very satisfactory.

Height	Each	10	100
2 to 3 feet	\$.75	\$6.00	\$50.00
18 to 24 inches	.60	5.00	40.00

Cornus alba sibirica CORAL DOGWOOD

An attractive, red-twigged medium-sized shrub which will stand a great deal of abuse. White flowers in June, followed by clusters of white berries. Fall foliage is good coppery red. Grows equally well in dry or moist soils. Prefers sun but will endure partial shade. Use in naturalistic plantings. Ideal for banks.

Height	Each	10	100
3 to 4 feet	\$.60	\$5.00	\$40.00
18 to 24 inches	.50	4.00	30.00

White berries of the Gray Dogwood on scarlet stems.

Cornus paniculata GRAY DOGWOOD

A medium size shrub, particularly valuable for naturalistic plantings. Small white flowers in July are followed by interesting clusters of buff white berries which contrast pleasingly with the gray bark. Will thrive in dry or moist soils, but prefers plenty of moisture and partial shade. A splendid shrub for mixed borders and underplanting in moist woods.

Height	Each	10	100
2 to 3 feet	\$.60	\$5.00	\$40.00

Cornus stolonifera RED OSIER DOGWOOD

An interesting red-twigged shrub, medium size, for naturalistic borders and bank plantings. Does well in sun or partial shade and in moist or dry soils.

Height	Each	10	100
3 to 4 feet	\$.75	\$6.00	\$50.00
2 to 3 feet	.50	4.00	35.00

Cornus stolonifera flaviramea GOLDENTWIG DOGWOOD

Another vigorous Dogwood similar to Red Osier but has yellow branches. Used for winter effect in combination with other Dogwoods, the green stemmed Kerria or fruiting shrubs. Vigorous, easy to grow.

Height	Each	10	100
2 to 3 feet	\$.60	\$5.00	\$40.00

Cydonia japonica FLOWERING QUINCE

An old time favorite. Grows to six feet. Profusely covered with picturesque single scarlet blossoms in late spring. Foliage glossy green. Prefers sun but stands partial shade. Very charming in mixed borders and groups about foundations. Blossoms good for cutting. A handsome lawn specimen.

Height	Each	10	100
2 to 3 feet	\$.90	\$8.00	\$60.00
18 to 24 inches	.75	6.50	50.00

Deutzia gracilis SLENDER DEUTZIA

On the grounds of every old-fashioned place. In spring the slender branches are covered with small white flowers. Low-growing, and a very desirable shrub for the foreground of foundation and border plantings. Does best in full sun and well-drained soils.

Height	Each	10	100
12 to 18 inches	\$.65	\$6.00	\$50.00

Deutzia scabra candidissima SNOWFLAKE DEUTZIA

Pure white, double flowers are borne profusely in June. Strong upright growth of medium height. This is a perfectly hardy Japanese shrub, superb for groups and borders, or for massing in the background. Vigorous and easy to grow anywhere.

Height	Each	10	100
2 to 3 feet	\$.60	\$5.50	\$50.00

Deutzia scabra Pride of Rochester PRIDE OF ROCHESTER DEUTZIA

This lovely old favorite will thrive almost anywhere. A profuse bloomer with large clusters of double white flowers tinged with rose in June. Forms an erect branching, shapely shrub five to six feet tall, valuable for border, screen or hedge or as a single specimen. Easy to grow and very vigorous. Always popular.

Height	Each	10	100
2 to 3 feet	\$.50	\$4.00	\$30.00

Deutzia Pride of Rochester

Our prices include packing and are f. o. b. Framingham

Euonymus alatus WINGED EUONYMUS

The chief glory of this big flat-topped shrub is its fall color of brilliant pink, scarlet and crimson. In winter its silhouette of stout twigs with wing-like corky ridges, is very picturesque. Grows best in full sun and well-drained soil, but will endure partial shade. Must be allowed to grow naturally.

Height	Each	10	100
2 to 3 feet	\$1.00	\$9.00	\$85.00
18 to 24 inches	.85	7.00	65.00

Exochorda grandiflora PEARL BUSH

A spreading shrub of tall, upright growth with narrow leaves, silvery on the underside. Covered with dazzling white flowers early in the spring almost before the leaves appear.

Height	Each	10	100
2 to 3 feet	\$.75	\$6.50	\$50.00

Forsythia Flowers

Forsythia intermedia spectabilis SHOWY BORDER FORSYTHIA

One of the very finest Goldenbells. The flowers, large and numerous, crowd the full length of the stems. The buds open later than those of other varieties. A very strong grower. Foliage glossy green.

Height	Each	10	100
2 to 3 feet	\$.75	\$6.00	\$50.00

Forsythia suspensa WEEPING FORSYTHIA

The gracefully drooping branches are covered with glorious golden-yellow flowers in early spring before the leaves appear. Forms a large broad thicker of long willowy branches that completely hide the ground. Excellent for massing on slopes or for thick screens. Does best in full sun in well-drained soil.

Height	Each	10	100
3 to 4 feet	\$.75	\$6.50	\$50.00
2 to 3 feet	.60	5.00	40.00

Forsythia suspensa fortunei

FORTUNE FORSYTHIA

This favorite Forsythia is erect, vigorous and of medium height. A rich mass of abundant golden yellow flowers appears in April before the leaves. Plant in full sun. A good background shrub in foundation and border plantings. Used successfully as a hedge plant when allowed to grow naturally. Very dependable.

Height	Each	10	100
3 to 4 feet	\$.75	\$6.50	\$60.00
2 to 3 feet	.60	5.00	45.00

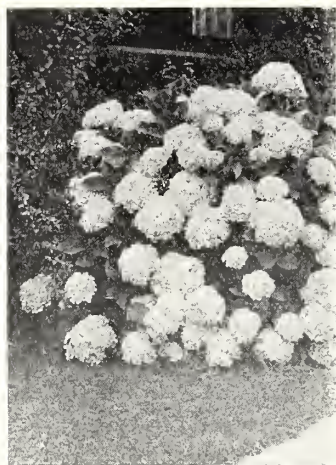

In November Witch Hazel unfolds its yellow blooms.

Hamamelis virginiana **WITCH HAZEL**

Unique, tall-growing shrub, which blossoms late in fall when other plants have dropped their leaves. Yellow star-shaped flowers are hidden midst a mass of yellow-tinted foliage. As the leaves fall the flowers are seen to better advantage. Thrives best in partial to full shade and does well in any soil. Use in naturalistic border and woods planting. Easy to grow and very dependable.

Height	Each	10	100
2 to 3 feet	\$.75	\$6.50	\$60.00
18 to 24 inches	.65	5.00	45.00

For midsummer bloom in shrubbery borders or foundation planting, use Snowhill Hydrangea.

Hydrangea arborescens grandiflora
SNOWHILL HYDRANGEA

Low, broad bush. In July and August the top of each branch is weighed down with a great cluster of handsome, pure white flowers. Blossoms are borne on new wood so shrub should be cut to the ground each spring. Thrives in sun or partial shade. Prefers moist well-drained soil. Use in foreground of shrub border and for foundation plantings.

Height	Each	10	100
2 to 3 feet	\$.75	\$6.50	\$60.00

Hydrangea paniculata
PANICLE HYDRANGEA

The parent form of the well known Peegee Hydrangea. The blooms are smaller and less showy and are held erect rather than drooping on strong upright stems. Considered by many more graceful and attractive than the Peegee.

Height	Each	10	100
2 to 3 feet	\$.75	\$6.50	\$60.00

"THE BOOK OF SHRUBS"

By Prof. Alfred C. Hottes. Gives complete description of each species, its characteristics, use, soil, pruning and propagation. Splendid tables giving height, soil and exposure, color and season of bloom and fruit, and lists for special purposes. Includes broadleaved evergreen shrubs. Profusely illustrated. \$3.00. Postage \$.15.

Hydrangea paniculata grandiflora
PEEGEE HYDRANGEA

Large shrub. Showy in midsummer, with immense white flowers turning pink to reddish purple in fall. Grows best in full sun. Use in mixed shrubbery borders as background plant.

Height	Each	10	100
3 to 4 feet	\$.90	\$7.50	\$65.00
2 to 3 feet	.75	6.00	50.00
3 to 4 feet tree form	1.50	12.50	

Hypericum densiflorum
GOLDEN ST. JOHNSWORT

Summer-blooming small shrub with bright yellow blossoms. Plant in full sun or partial shade.

Height	Each	10
2 to 3 feet	\$.75	\$6.00

Ilex verticillata **WINTERBERRY**

Very desirable in foundation and border plantings because of highly colored red fall foliage and red berries. Thrives in moist soils and sun or shade. Illustrated below.

Height	Each	10	100
2 to 3 feet	\$1.00	\$8.50	\$75.00

Red fruits of Black Alder or Winterberry.

Our prices include packing and are net, f. o. b. Framingham

Kerria japonica **KERRIA**

An interesting, medium-sized, green-twigged shrub with showy, single yellow flowers in early spring. Use in foundation and mixed border plantings in full sun or partial shade. Thrives in any soil.

Height	Each	10
18 to 24 inches	\$.75	\$6.00

Kolkwitzia amabilis **BEAUTYBUSH**

A new shrub of outstanding merit. Handsome in flower, the whole shrub, which grows five to seven feet tall, is completely covered with tiny pink Weigela-like blossoms in June. Absolutely hardy and very free growing. Considered by its introducer, the late Dr. E. H. Wilson, to be one of the finest exotic plants ever brought into American gardens.

Height	Each	10
12 to 18 inches	\$2.00	\$17.50

Ligustrum amurense **AMUR PRIVET**

A fast growing upright shrub with clean, fine foliage. Especially good for hedges, screens and tall masses either in sun or shade.

Height	Each	10	100
3 to 4 feet	\$.60	\$4.00	\$30.00
2 to 3 feet	.40	2.50	18.00

Ligustrum ibota **IBOTA PRIVET**

A vigorous shrub of tall graceful habit with many small, fragrant white flowers followed by decorative dark, blue-black berries in the fall and winter.

Because of its extreme hardiness it is fast replacing the California Privet which even in old plants is killed outright in severe winters. Makes a splendid hedge or thick screen. Does well in any soil and in sun or shade.

Height	Each	10	100
3 to 4 feet	\$.50	\$3.50	\$20.00
2 to 3 feet	.40	2.50	15.00

Ligustrum ovalifolium
CALIFORNIA PRIVET

Rapid and vigorous in growth with attractive, clean, glossy foliage on stiff, upright branches. Grows well in sun. Good for quick, inexpensive hedge. Not particularly hardy in New England.

Height	Each	10	100
2 to 3 feet	\$.25	\$1.80	\$12.00
18 to 24 inches	.20	1.50	10.00

Fragrant blooms of Honeysuckle are followed by scarlet fruit in midsummer.

Lonicera morrowi

MORROW HONEYSUCKLE

Tall spreading shrub which sometimes grows ten feet high and often twice as broad. Intricate flat branches with gray-green foliage, and in July a profusion of creamy white flowers, followed by scarlet berries. Grows best in sun or partial shade. Use in mixed shrubby borders, on banks and as a screen. Does well in almost any soil.

Height	Each	10	100
2 to 3 feet	\$.50	\$4.00	\$30.00

Lonicera tatarica alba

WHITE TATARIAN HONEYSUCKLE

Large shrub—grows twelve feet high and fifteen feet wide. White flowers in spring followed by red berries. Splendid shrub for background or screen. Easy to grow.

Height	Each	10	100
2 to 3 feet	\$.50	\$4.00	\$30.00

Lonicera tatarica rosea

PINK TATARIAN HONEYSUCKLE

Similar to the above with flowers of rich rose pink. A lovely old favorite, deservedly popular for its delicate coloring and fragrant blossoms.

Height	Each	10	100
2 to 3 feet	\$.60	\$5.00	\$45.00

Bayberry—prized for winter decoration.

Myrica carolinensis

NORTHERN BAYBERRY

Grows up to four feet. Clean, glossy foliage. Clusters of hundreds of small fragrant, waxy, gray berries along stems. Does particularly well in sandy seashore soils in full sun. Used to good advantage in evergreen foundation plantings. Bayberry candles are made from the fruits.

Height	Each	10	100
18 to 24 inches	\$1.00		\$8.00

Philadelphus coronarius

SWEET MOCKORANGE

A favorite in Grandmother's garden. Tall, growing, upright, with clusters of intensely fragrant white flowers in May or June. Splendid for shrub borders, banks and screens. Does best in full sun and well drained soil.

Height	Each	10	100
4 to 5 feet	\$.75	\$6.00	
3 to 4 feet	.60	5.00	\$45.00

Philadelphus grandiflorus

BIG SCENTLESS MOCKORANGE

An extremely hardy, tall shrub. Large flowers about one and one half inches across. Scentless blossoms have waxy petals and prominent deep yellow stamens. Grows best in full sun. Use as a background plant in borders or screens.

Height	Each	10	100
4 to 5 feet	\$.75	\$6.50	
3 to 4 feet	.60	5.00	

Mockorange
Virginal

Philadelphus **HYBRID MOCKORANGE**

Most of these are low-growing compact bushes, which during their season of bloom, are literally smothered with fragrant white blossoms. Excellent for shrubby borders and in groups with taller growing varieties.

2 to 3 feet tall, \$.75 each,
\$6.00 for 10 except as noted.

ALBATRE—Single, snowy white.

AVALANCHE—profuse large single white flowers on slender branches arching gracefully to the ground. Fragrant.

BANNIERE—large semi-double creamy white flowers. Early.

FAVORITE—large single flowers. A very shapely shrub. \$1.00 each; \$9.00 for 10.

GLACIER—profuse double creamy white flowers.

VIRGINAL—unusually large flowers, two and one half inches across, pure white, semi-double and slightly fragrant. Valuable for cutting. \$1.00 each; \$9.00 for 10.

Pink Flowering Almond.

Prunus glandulosa

DOUBLE PINK FLOWERING ALMOND

A charming old fashioned shrub with exquisite, double rose-like flowers which cover the slender branches in great profusion in early spring. Very showy. Ideal for planting about foundations or in mixed borders. Prefers sun and good garden soil.

Height	Each	10	100
2 to 3 feet	\$1.00	\$9.00	

Prunus tomentosa **NANKING CHERRY**

A spreading extremely hardy shrub of moderate height. Red flower clusters and calix and pure white petals. Pink in bud. Scarlet berry-like fruit ripens in June and is very palatable. Thrives best in well drained soils in full sun. Use as a background plant.

Height	Each	10	100
2 to 3 feet	\$.75	\$6.00	

Our prices include packing and are f. o. b. Framingham

Rhamnus cathartica

BUCKTHORN

Tall growing shrub with inconspicuous white flowers and blue-black fruit. Will thrive almost anywhere but does best in a cool, moist situation. A strong grower. Used extensively in old Colonial days as a hedge plant. Use on banks and for hedges and screens.

Height	Each	10	100
5 to 6 feet	\$1.00	\$8.50	\$80.00
4 to 5 feet	.75	6.50	60.00
3 to 4 feet	.60	5.00	45.00

Rhodotypos kerrioides

JETBEAD

Medium size. Strong blooming. White flowers followed by black fruits. Thrives best in well drained sunny locations. A good shrub for planting about foundation and in mixed shrubby borders.

Height	Each	10	100
18 to 24 inches	\$.60		\$40.00

Spiraea Anthony Waterer

ANTHONY WATERER SPIREA

Popular low growing shrub. Deep rose flowers in July and August. Does best in full sun and well drained soil. Use as a foreground plant.

Height	Each	10	100
18 to 24 inches	\$.60	\$5.00	\$40.00
12 to 18 inches	.50	4.00	30.00

Spiraea arguta

GARLAND SPIREA

Very hardy and floriferous. Long sprays of white flowers in early spring. Red foliage in fall. Thrives in full sun or partial shade. Useful for hedges, foundation and mixed shrubby plantings.

Height	Each	10	100
2 to 3 feet	\$.50	\$4.00	\$35.00

Garland Spirea.

Spiraea thunbergi **THUNBERG SPIREA**

Free flowering, slender twiggy shrub. Grows about five feet high. Drooping branches covered with white button-like flowers in May. Feathery foliage, bright green during the summer, orange-scarlet in autumn. Does well in well drained garden soil and sunny location. Use for foundation and mixed shrubby plantings.

Height	Each	10	100
18 to 24 inches	\$.60	\$5.00	\$40.00

Spiraea trichocarpa **KOREAN SPIREA**

One of the best of the most recent introductions. A compact bush of rounded habit, with graceful arching branches. Grows six feet tall and ten feet broad. Drooping plumes of white blossoms. Grows best in full sun and well drained soil. Excellent for foundation and mixed shrubby plantings. Blooms later than Thunberg.

Height	Each	10	100
2 to 3 feet	\$1.50		\$14.00
18 to 24 inches	1.25		11.00

*Spiraea vanhouttei***VANHOUTTE SPIREA**

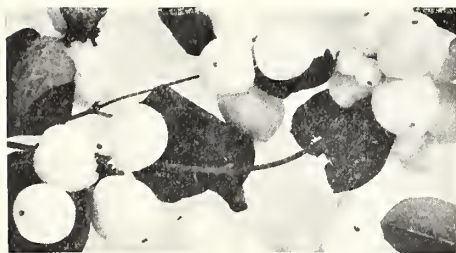

One of the finest and most useful medium-sized shrubs. Long arching branches are completely covered with glorious sprays of white flowers in late May and early June. Use in full sun in foundation and border plantings.

Height	Each	10	100
3 to 4 feet	\$.60	\$5.00	\$40.00
2 to 3 feet	.50	4.00	30.00

*Symphoricarpos chenaulti***HYBRID PINK SNOWBERRY**

This recent introduction is medium-sized with inconspicuous pink flowers and an abundance of showy pink fruits on branches which arch to the ground. A splendid all around shrub which grows equally well in sun or shade, dry or moist soils. Use in foreground of foundation groups or shrubby borders.

Height	Each	10
2 to 3 feet	\$1.00	\$9.00

White waxy fruit of Snowberry

*Symphoricarpos racemosus***SNOWBERRY**

An old time favorite. Medium-sized with inconspicuous pink flowers in early summer. Large waxy white berries persist into the winter. Does well in sun or shade, dry or moist soils. Fine for foundation and mixed border planting.

Height	Each	10	100
2 to 3 feet	\$.50	\$4.50	\$40.00
18 to 24 inches	.40	3.50	30.00

*Symphoricarpos vulgaris***CORALBERRY**

Dependable, medium-sized shrub with small leaves and inconspicuous flowers. In autumn the clusters of purplish red berries are very showy. Does well in sun or shade. Excellent for covering banks and for foreground of foundation and border plantings.

Height	Each	10	100
2 to 3 feet	\$.50	\$4.50	\$40.00
18 to 24 inches	.40	3.50	30.00

*Syringa chinensis***CHINESE LILAC**

This very floriferous Lilac resembles its Persian parent in the slender branches, narrow leaves and small flowers borne in enormous clusters. The color shows the influence of the old fashioned Lilac. Tall growing. A splendid background plant. Does best in sun and well drained soil.

Height	Each	10
2 to 3 feet	\$1.00	\$9.00

*Syringa josikea***HUNGARIAN LILAC**

A large shrub with erect, fairly stout branches. Bluish-purple flowers in early June. Valuable for screens and in the background of shrubby borders.

Height	Each	10
2 to 3 feet	\$1.00	\$9.00

Hybrid Lilac

*Syringa persica***PERSIAN LILAC**

A broad shapely bush. Grows six to seven feet tall and somewhat broader. Extraordinarily floriferous. Huge clusters of fragrant, pale rosy purple flowers arch the slender branches in May or June. Thrives in sun and any soil.

Height	Each	10
3 to 4 feet	1.25	\$11.00
2 to 3 feet	\$1.00	9.00

*Syringa villosa***LATE LILAC**

Large, vigorous floriferous shrub with handsome pale rose, sometimes nearly white, flowers. Last of Lilacs to bloom. Thrives in most soils and in sun. Excellent for screens and backgrounds.

Height	Each	10
2 to 3 feet	\$1.00	\$9.00

*Syringa vulgaris***OLD FASHIONED LILAC**

Best known of all the Lilacs. Fragrant blossoms in late May. A large shrub. Best in sun and well drained soil. White or purple flowers. Specify color desired.

Height	Each	10
2 to 3 feet	\$1.00	\$9.00

*Syringa***HYBRID LILACS**

Described with our specialties on page 31.
2 to 3 feet tall Each \$1.50 except as noted.
CONGO—large trusses deep lively red, 3 to 4 feet, \$3.00 each.

LUCIE BALTET—large open pink clusters.

3 to 4 feet \$2.00 each.

MADAME CASIMIR PERIER — Creamy white, 18 to 24 inches \$1.25 each.

MADAME LEMOINE—large, double white.
SOUVENIR DE LUDWIG SPAETH—deep grape red or rosy purple flowers—single, very choice.

PRESIDENT CARNOT—single, pale lilac.

PRESIDENT GREVY—very large light lavender blue, double, flower sprays a foot long.

*Vaccinium corymbosum***HIGHBUSH BLUEBERRY**

Medium-sized, handsome all around shrub. Small creamy white flowers in June are followed by blue black edible fruits. Foliage brilliant red in fall. An ideal shrub for shaded foundation and border plantings. Does best in acid soil, dry or moist.

Height	Each	10
2 to 3 feet	\$1.50	\$12.50

*Viburnum carlesii***MAYFLOWER VIBURNUM**

Listed with our novelties on page 31.

Height	Each	10
18 to 24 inches	\$3.00	

*Viburnum cassinoides***WITHEROD**

One of loveliest medium-sized shrubs. White flowers, yellow tinged, in June. Showy fruits change from creamy white to red and blue black. Clean foliage of good green. Thrives best in partial and full shade and in cool moist soils. Use in naturalistic plantings.

Height	Each	10	100
2 to 3 feet	\$.90	\$7.50	\$60.00

*Viburnum dentatum***ARROWWOOD**

Inconspicuous white flowers are followed by beautiful blue berries. A vigorous shrub which grows in full sun or under trees. The foliage, neatly toothed and prominently veined, is especially handsome.

Height	Each	10	100
4 to 5 feet	\$.90	\$7.50	\$60.00
3 to 4 feet	.75	6.00	50.00

*Viburnum opulus***EUROPEAN CRANBERRYBUSH**

Large shrub with bright green maple-like clusters of leaves. Flat heads of white blossoms in May. Luscious red fruits are very showy during summer and fall. Does best in shade and cool moist soil. Use in background of shrubby border.

Height	Each	10
18 to 24 inches	\$.60	\$5.00

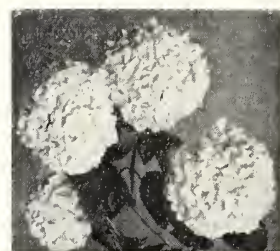

*Viburnum opulus sterile***SNOWBALL**

Tall vigorous shrub of old-fashioned gardens. The large round balls of white flowers in June resemble those of the Hills of Snow Hydrangea.

Height	Each	10
2 to 3 feet	\$1.00	\$8.00

*Viburnum tomentosum plicatum***JAPANESE SNOWBALL**

Handsome shrub of good size. More showy and cleaner foliaged than above variety. Thick, beautifully crimped leaves. Large balls of white flowers in June. For shrub border.

Japanese Snowball

Height	Each	10
3 to 4 feet	\$1.25	\$10.00

*Weigela Eva Rathke***WEIGELA EVA RATHKE**

Old-fashioned medium-sized shrub prized for its rich crimson-red blossoms in July. Buds are a much darker red. Valuable in foundation and shrubby plantings. Does best in full sun and any well drained soil.

Height	Each	10	100
2 to 3 feet	\$.75	\$6.50	\$55.00

*Weigela hendersoni***HENDERSON WEIGELA**

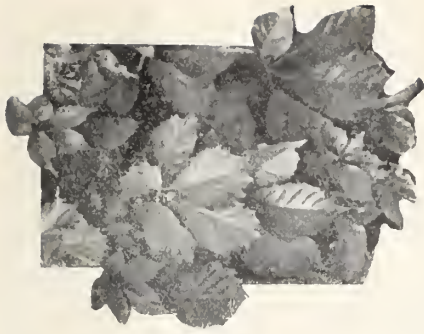

An unusual variety with many bright blooms of light crimson. Unique among flowering shrubs. Use in the border or as a specimen.

Height	Each	10
2 to 3 feet	\$.75	\$6.00

*Weigela rosea***PINK WEIGELA**

Desirable medium-sized shrub. Lovely pink flowers in May and June. Thrives in full sun and well drained soil. Use in foundation plantings, shrub borders and for untrimmed hedges.

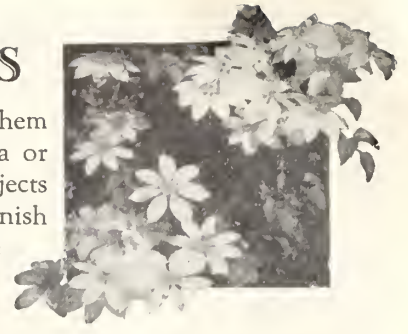

Height	Each	10	100
2 to 3 feet	\$.60	\$5.00	\$40.00
18 to 24 inches	.50	4.00	30.00

Virginia Creeper

LITTLE-TREE VINES

EVERY home should have a vine or two. Plant them to give shade and privacy to porch, pergola or terrace, to break monotonous fence lines, hide objects which cannot be removed. They will also furnish food, nesting place and shelter for birds, the great friends of a garden.

Jackman Clematis

Ampelopsis quinquefolia

VIRGINIA CREEPER

Known also as Woodbine. A rapid growing, vigorous vine with clean green foliage changing to brilliant reds in autumn. Very striking with blue fruits on coral red stems in the fall. Splendid for covering stone walls. Does well in shade. Clings by means of aerial roots which twine round its support.

2 year grade Each \$.50 10—\$3.50 100—\$30.00

Ampelopsis quinquefolia engelmanni

ENGELMANN CREEPER

Similar to Virginia Creeper except that it clings by means of little vacuum cups to any flat surface, requiring no support. Ideal for covering house foundation walls, chimneys, brick walls, outbuildings, fences and arbors.

3 year grade Each \$.60 10—\$5.00 100—\$35.00

Ampelopsis tricuspidata

JAPANESE CREEPER

The much loved Boston Ivy, extensively planted on brick buildings and walls. Very vigorous, beautiful glossy foliage turning scarlet, red and crimson in the fall. Clings to any surface.

3 year grade Each \$.75 10—\$6.50 100—\$60.00

Aristolochia sipho

DUTCHMAN'S PIPE

Large, handsome, heart shaped leaves form a dense mass of clean foliage. Excellent for screens or boundary fences. A rapid grower when established.

3 year grade Each \$1.25 10—\$11.00 100—\$100.00

Bignonia radicans

TRUMPET CREEPER

Flaming clusters of orange-red flowers in July and August. A high climber. Requires no support.

3 year grade Each \$.60 10—\$5.00

Celastrus orbiculatus

ORIENTAL BITTERSWEET

A handsome, clean, glossy foliaged vine, jewelled with showy red berries. Much prized for winter decoration. A rampant grower for porch or pergola, stone walls and fences.

5 year grade Each \$1.00 10—\$8.00

Clematis

LARGE FLOWERING CLEMATIS

For brilliant, large blooms in midsummer, nothing equals these graceful hybrid Clematis.

2 year grade Each \$1.50 10—\$12.50

HENYRI—large creamy-white single flowers.

JACKMANI—broad single flowers of deep velvety purple.

Clematis paniculata

SWEET AUTUMN CLEMATIS

Very popular. Numerous panicles of dainty, fragrant, white flowers in fall. Will grow in partial shade.

3 year grade Each \$.60 10—\$5.00

Clematis virginiana

VIRGIN'S BOWER

A strong climber. Dark green deeply-toothed foliage turns purple in fall. Starry white flowers in August.

2 year grade Each \$.50 10—\$4.00

Lonicera japonica halleana

HALL JAPANESE HONEYSUCKLE

A vigorous fast grower. Dark, glossy evergreen foliage. Very fragrant yellow-white flowers. Excellent to cover banks and to screen verandas and pergolas.

3 year grade Each \$.50 10—\$3.50 100—\$30.00

Wisteria sinensis

CHINESE BLUE WISTERIA

A favorite. Pendulous clusters of richly pertumed violet blue blossoms in May and scattering blooms in August. Long-lived and vigorous.

5 year grade Each \$1.25 10—\$11.00

Wisteria sinensis alba

WHITE WISTERIA

A white flowered variety of the preceding.

5 year grade Each \$1.25 10—\$11.00

Hall Japanese Honeysuckle

Chinese Blue Wisteria

LITTLE-TREE GRASS SEED

OUR Grass Seed Mixtures are the result of years of experience and scientific study. They are particularly adapted to the soils of New England and New York. Allow one pound to 200 square feet for new lawns.

VELVET LAWN MIXTURE

Contains only the highest quality, selected seeds of choicest varieties and free from weed seeds. Use "Little-Tree No Weeds Fertilizer" for best results.

1 lb.	\$.75	5 lbs.	\$3.50
10 lbs.	6.50	25 lbs.	15.00
		100 lbs.	\$55.00

SHADY SPOT MIXTURE

A "sure fire" mixture for shady spots. Scientifically selected grass seeds adapted to fairly dense shade. Succeeds where other cheaper mixtures fail.

1 lb.	\$1.00	10 lbs.	\$7.00
2 lbs.	1.75	25 lbs.	16.00
5 lbs.	4.00	100 lbs.	60.00

For Success with Lawns—learn how to care for them right. Read the best book on the subject, "The Lawn" by L. S. Dickinson, a recognized authority. See page 57.

Use "Little-Tree No Weeds Lawn Fertilizer" to check weeds and give good green turf. 5 lbs. to 300 square feet. 5 lbs. \$.60 25 lbs. \$2.00 100 lbs. \$5.00

In shade under trees, where grass is difficult to establish, plant *Pachysandra* six to eight inches apart as a ground cover. See page 31.

Trial Garden of the American Rose Society at Elizabeth Park, Hartford, Conn.

HYBRID TEA ROSES

COMMON to all ages and all countries is the rose, a remarkable tribute to its universal popularity. Within the last years enormous strides have been made in developing better everblooming sorts known as hybrid teas, which flower all summer. No other flowers compare with them for exquisite coloring, marvelous size, form and fragrance. All are hardy two year old field grown plants. Set them 2 feet apart.

\$1.00 each. \$.90 each for 5 or more of the same variety, except as noted.

RED

DAME EDITH HELEN—One of the largest, most perfectly shaped bright pink roses. A handsome new variety. Long strong stems, good foliage. Prolific. Exceptionally sweet scented.

KILLARNEY—Lovely, long pointed buds, which open into large loose blooms of pink, tinted white. Fragrant.

LOS ANGELES—Very lovely buds and exquisite flowers of salmon-pink with yellow shading. Very sweetly perfumed. One of the most beautiful roses yet introduced.

MME. BUTTERFLY—Fine, light pink buds and flowers tinted with gold near the base of the petals. Richly perfumed.

MME. CAROLINE TESTOUT—Well-shaped blossoms and large, fragrant satiny rose-pink flowers. Extremely popular.

MME. EDOUARD HERRIOT—Semi-double flowers of indescribably brilliant orange-red and salmon. One of the very best.

MRS. A. R. BARRACLOUGH—Bright, but soft sparkling carmine-pink that passes to yellow at base of petals. Does not fade, but becomes richer. Attractive. Fragrant.

PINK

FRANCIS SCOTT KEY—A glorious rose with large bright crimson buds and blossoms. Slightly fragrant. Prolific bloomer. Good foliage.

GEORGE C. WAUD—A unique shade of light red with a suggestion of orange and vermillion. Slightly fragrant.

GENERAL MACARTHUR—Large full velvety flowers, crimson-scarlet. Good foliage. The best red bedding rose.

GRUSS AN TEPLITZ—3 to 4 feet tall erect plants covered all season with beautiful deep crimson flowers. A favorite for bedding. Very vigorous.

MARGARET MCGREDY—Very new, and a winner everywhere. Brilliant red petals on hinges of gold. Blooms continually. Spicy fragrance.

RED RADIANCE—A lovely bright red form of Radiance with similar good habits, fragrant and free flowering.

WHITE

KAISERIN AUGUSTE VIKTORIA—Soft, pearly white, tinged lemon. Fragrant. Considered most beautiful of creamy-white roses. Constant bloomer.

MISS WILLMOTT—The almost perfect white rose. Large white flowers with an occasional touch of cream or pink. Persistent bloomer especially in hot weather.

YELLOW

JULIEN POTIN (GOLDEN PERNET)—Unquestionably the most gorgeous and brilliant yellow rose yet introduced. Grows richer and deeper as the flowers mature. Sweet scented.

OPHELIA—Large, full, perfect blooms, light salmon shading to yellow. Very fragrant. One of the best.

REV. F. PAGE ROBERTS—Marvelously colored flowers of golden yellow, stained copper and reddish-buff on outside. New. Fragrant.

SUNBURST—Long lovely buds of sulphur yellow, shaded orange, open into cup shaped flowers. Fragrant.

VILLE DE PARIS—Distinct clear, rich buttercup-yellow retaining its richness under all weather conditions. Profuse bloomer. A Gold Medal Rose.

SHRUB TYPES OF ROSES

THESE are the taller, more vigorous growing sorts, blooming mostly in June and including most of the old fashioned roses and rose species. They have more abundant flowers than any other group, and some have interesting fruit. All Little-Tree Farms roses are perfectly hardy two year old field grown plants.

HYBRID PERPETUALS

THESE are the roses of our grandmothers. Hardy, vigorous and dependable. In June flowers are produced in one great burst of bloom, a lavish display unsurpassed by any other sorts. The flowers are larger and generally more fragrant than those of the modern roses. A few Pernetiana and Briar roses with similar habits are included here. \$1.00 each \$.90 each for 5 or more of one variety.

FRAU KARL DRUSCHKI—Pink tinged buds and enormous snow white flowers of perfect form. Slightly fragrant. One of the best hardy white roses. Vigorous and as free flowering as a hybrid tea.

GENERAL JACQUEMINOT—Known as the "Jack Rose." Fragrant large blooms of brilliant scarlet. Early. Dependable.

MAGNA CHARTA—An old favorite. Profuse large blooms, fragrant, rich rosy-pink.

MARGARET DICKSON—White with a rosy-flesh center. Delicately fragrant. Growth is strong and compact. Handsome foliage.

MRS. JOHN LAING—Dependable. Immense, full, exceedingly fragrant soft pink blooms in great profusion all summer. Handsome foliage.

PAUL NEYRON—Exceptionally large fragrant flowers of beautiful clear pink shading to rose. Robust.

PERSIAN YELLOW—An old time favorite. Exquisite, large, nearly double, blooms of deep golden yellow. Decidedly fragrant. Especially hardy.

PRINCE CAMILLE DE ROHAN—Also called the "Black Rose." Dark, blood-red and maroon blooms. Deliciously fragrant.

"HOW TO GROW ROSES"

By Pyle, McFarland and Stevens. New edition. Written from the life time experience of three of our greatest growers. Full information on the culture and care of roses. Gives latest data about varieties, culture and use of all types of roses. Sure to be welcomed by both amateur and professional growers. 211 pages; 138 illustrations; 45 in full color. \$2.00. Postage \$.15.

Our prices include packing and are f.o.b. Framingham.

SOLEIL D'OR—Double flowers in which reddish-gold orange, yellow, red and rosy-pink are wonderfully intermingled. Fragrant. Vigorous.

ULRICH BRUNNER—One of the best. Profuse, fragrant blooms of bright cherry-red. Vigorous.

ROSE SPECIES

TO THIS group belong the native wild roses of many lands. All are tough, robust, bushy growers, used to rigorous climate and exposure and requiring little care. Many have scarlet fruit, and handsome foliage. Particularly valuable for massing in impenetrable thickets or hedges, for mixing in the shrub border or covering bankings.

2 year plants, \$.75 each; \$6.00 for 10 except as noted.

Rosa hugonis

HUGONIS ROSE. Extremely popular. Among the earliest of roses to bloom. Blooms single profuse, transforming the gracefully arched branches into a bouquet of soft yellow. Foliage acacia-like and persistent. \$1.25 each.

Rosa rugosa

RUGOSA ROSE. A beautiful shrub with rosy-carmine blossoms, singly or in clusters, dark, lustrous wrinkled foliage and brilliant orange-red fruits. Known in Japan as the "sea-tomato" because of its fruit and its vigorous growth under seashore conditions. Grows well anywhere. For hedge or border.

Rosa rubrifolia

REDLEAF ROSE. Flowers deep pink, lighter with age. Foliage blue-green tinged with purplish-red. Fruit scarlet. Hardy, unusual. For massing and poor soil.

Rosa setigera

PRAIRIE ROSE. A splendid, wide sprawling shrub from the middle west. Three part leaves on long, tangled arching stems. Profuse rose blooms. Lasting scarlet fruit. Unexcelled for slopes and thickets.

"THE ROSE IN AMERICA"

By J. Horace McFarland. A complete guide to successful rose growing. The last word on varieties, cultivation and pest control. 66 illustrations, 233 pages. \$3.00. Postage \$.15.

ROSES

By F. F. Rockwell. Contains a new classification of kinds most likely to succeed. Helpful directions on culture, propagation and planting. \$1.00. Postage \$.15.

LITTLE-TREE CLIMBING ROSES

THESE are most valuable for decorative purposes. They bloom profusely and may be trained over walls or fences, on posts, trellises and porches, as ground cover or on banks. All are 2 year, field grown plants.

\$.75 each \$.60 each for 5 or more of same variety.

PINK

American Pillar

AMERICAN PILLAR—Popular. Large single flowers, of beautiful rosy-pink with white eye and yellow stamens, borne in huge clusters. Profuse blooms. Superb over low fences, stone walls or trained as a pillar on upright posts. Attractive red fruit.

DOROTHY PERKINS—Clear shell-pink flowers, slightly fragrant, borne profusely in lovely sprays. Much prized for cutting. Very hardy and vigorous. Extensively planted on banks and slopes, porches and trellises. Most popular.

DR. W. VANFLEET. The very choicest pink climber. Large flowers of exquisite flesh-pink, prettily formed like tea roses, each on a long stem. Ideal for cutting. Handsome glossy foliage all season. Vigorous.

RED

Climbing American Beauty

CLIMBING AMERICAN BEAUTY—One of the best climbers, free blooming, vigorous. Beautiful large buds and immense flowers of brilliant carmine. Fine for cutting. Fragrant. Early. Good foliage.

EXCELSA—Brilliant, scarlet-crimson blooms borne in large trusses. Vigorous. Graceful pendant habit. Abundant, glossy, disease-resistant foliage.

PAUL'S SCARLET CLIMBER—Finest, brightest, purest red of all the Pillar Roses. Flowers are produced freely in clusters, are semi-double with their beauty intensified by a mass of golden-yellow stamens. The color holds until the petals drop.

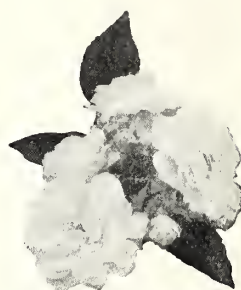

Dr. W. Van Fleet

Dorothy Perkins

WHITE

White Dorothy Perkins

BALTIMORE BELLE—An old favorite full of associations with lovely colonial gardens. Cream-colored, pleasingly fragrant flowers, often flushed light-pink. A tall, rapid grower.

MEMORIAL ROSE—The old-fashioned trailing Wichuriana Rose. An excellent ground cover, forming a broad mat of glossy, leathery leaves. Large clusters of starry white fragrant flowers with yellow stamens late in the season. Very vigorous. Valuable for ground cover, for walls and fences.

SILVER MOON—A very vigorous climber with glossy disease-resistant foliage and large semi-double fragrant flowers, pure white with yellow stamens. The most beautiful and popular white climber. Far superior to the old rambler type.

WHITE DOROTHY PERKINS—An exact counterpart of Pink Dorothy Perkins. Buds show a trace of pink opening to a pure dazzling white.

YELLOW

Paul's Scarlet Climber

LE REVE—An absolutely hardy, unfading yellow climber. Flowers, large and semi-double, have delightful fragrance. Foliage is dark and glossy. Strong.

PRIMROSE—New. A hardy yellow climber with profusion of double canary-yellow flowers. Lighter color than Le Reve. Satisfactory in the North.

Right up to frost the baby ramblers are gay with bloom.

Silver Moon

DWARF POLYANTHA OR BABY RAMBLER ROSES

A NEW race of baby ramblers, 2 feet tall, giving continuous and prolific bloom from June to October. Ideal for bedding or edging.
\$1.00 each; \$9.00 for 10.

CECIL BRUNNER OR SWEETHEART ROSE—Exquisite, pointed buds and flowers of pink and gold, like tiny tea roses. Excellent for cutting.

CHATILLON—Large clusters of silvery-crimson, semi-double flowers remaining for several weeks before shedding a petal.

EVA TESCHENDORFF—Distinct. Charming, clustered, frilled, snow white flowers, greenish centers.

GOLDEN SALMON—A most striking recent introduction, novel and distinct in color. Brilliant golden-orange scarlet flowers in huge clusters. Always in bloom and greatly admired.

IDEAL—Rich, dark red. Double and slightly fragrant. Very hardy. Blooms all summer.

Baby Rambler

Our prices include packing and are f.o.b. Framingham.

LITTLE-TREE PERENNIALS

THESE include the old-fashioned hardy flowers of Colonial gardens and many new improved varieties. They are the joy of any garden from early May until severe freezing weather in October, giving plentiful bloom in unending variety during the entire growing season. We offer vigorous two year old field-grown clumps, of proper size for transplanting.

They will take hold readily and many of them will bloom the first year. The varieties listed, which are most satisfactory and desirable under average conditions, were chosen by our Landscape Department for hardiness general attractiveness and ease of culture. Consult us further for help in selection or arrangement. See page 53 for information about our service.

Hybrid White Yarrow

ACHILLEA ptarmica Perry White

HYBRID WHITE YARROW. A choice new variety. Flowers over one inch across with broad overlapping petals. Fine for cutting. Narrow toothed leaves. Vigorous grower. White. 18 inches. Sun or shade. Succeeds in dry soil. June to September.
Each \$.35 10—\$2.50 100—\$18.00

ACONITUM fischeri

AZURE MONKSHOOD. This is the hardiest, best, and most useful of all the Aconites. Large, dark blue flowers on short spikes with bright glossy foliage. 2 to 3 feet. Sun or shade. Any soil. September and October.
Each \$.40 10—\$3.50 100—\$25.00

ALTHEA rosea

HOLLYHOCK. A constant, old-fashioned garden favorite. Assorted colors. Greatly admired for its tall, stately stalks covered with flowers. Single or double. State choice. 4 to 6 feet. Any soil. July and August.
Each \$.30 10—\$2.20 100—\$15.00

ALYSSUM saxatile compactum

DWARF GOLDENTUFT. Forms low broad mounds of gray-green foliage smothered with showy, bright yellow fragrant flowers. Easy to grow. Superb spring color. 12 inches. Sun. Well-drained soil. April to June.
Each \$.30 10—\$2.20 100—\$15.00

ANCHUSA italica dropmore

DROPMORE BUGLOSS. Large perennial with tall spikes of beautiful forget-me-not blue, flowering freely all summer if not allowed to seed. 4 to 5 feet. Sun. Any soil. June to September.
Each \$.30 10—\$2.50 100—\$18.00

ANEMONE hupehensis

EARLY ANEMONE. A hardy wind-flower from Central China with pretty mauve-rose colored flowers 1½ inches across. 12 to 14 inches. Shade. August to October.
Each \$.35 10—\$2.50 100—\$18.00

A. japonica alba

WHIRLWIND ANEMONE. Lovely large, long stemmed single white flowers with yellow centers. Splendid for cutting. 2 to 3 feet. Sun. Moist, well-drained soil. September to November.
Each \$.35 10—\$2.50 100—\$20.00

A. japonica Queen Charlotte

QUEEN CHARLOTTE ANEMONE. Large, abundant, semi-double pink flowers, broad and perfectly formed. Vigorous. 2 to 3 feet. Sun. Moist, well-drained soil. September to November.
Each \$.35 10—\$2.50 100—\$20.00

AQUILEGIA caerulea

COLORADO COLUMBINE. Large, long-spurred, blue and white flowers. Showy. 12 to 18 inches. Prefers sun but will do well in partial shade. Well-drained soil. May to July.
Each \$.35 10—\$2.50 100—\$18.00

A. canadensis

AMERICAN COLUMBINE. Native. One of the brightest. Scarlet sepals and bright yellow petals. 12 to 18 inches. Sun or partial shade. Well-drained soil. May and June.
Each \$.35 10—\$2.50 100—\$18.00

A. chrysantha

GOLDEN COLUMBINE. Numerous fragrant flowers of soft yellow with long slender spurs. Splendid for cutting. 2 to 3 feet. Prefers sun. Any well-drained soil. Profuse bloomer. June to August.
Each \$.35 10—\$2.50 100—\$18.00

A. hybrids

HYBRID LONG-SPURRED COLUMBINE. Choice Columbines in beautiful pastel shades. Assorted colors only. Exquisite for cutting. 2 to 3 feet. Prefer sun. Any well-drained soil. June to August.
Each \$.35 10—\$2.50 100—\$18.00

ARABIS alpina

ALPINE ROCKCRESS. Dense masses of pure white flowers, which last well when cut. Fragrant. Foliage good gray-green. Profuse bloomer. 9 to 12 inches. Sun. Any well-drained soil. April and May.
Each \$.35 10—\$2.50 100—\$18.00

New England Aster

Juno Astilbe

White Boltonia

Carpathian Bellflower

Peachleaf Bellflower

Persian Centaurea

ARENARIA verna caespitosa

MOSS SANDWORT.—A thick mossy mat of emerald green dotted with small silvery white flowers. Excellent for rock gardens and for crevices in walls and paved walks. June.

Each-.35 10-\$2.50 100-\$18.00

ARTEMISIA vulgaris lactiflora

WHITE MUGWORT.—Tall loose panicles of creamy-white flowers. Very fragrant. Good for cutting. An excellent hardy plant for borders. 3 to 4 feet. August and September.

Each-.35 10-\$2.70 100-\$20.00

ASCLEPIAS tuberosa

BUTTERFLYWEED.—One of the showiest and most beautiful plants. Wonderfully vivid orange blossoms. Grows about 18 inches tall. Use in sun. Endures dry soil. July and August.

Each-.35 10-\$3.00 100-\$21.00

ASTER alpinus

ROCK ASTER.—Blue Mountain Daisy of the Alps. Pale violet blue flowers with golden centers. Grows 6 to 12 inches. Excellent for rock gardens. Will thrive in dry soil. May and June.

Each-.30 10-\$2.50 100-\$20.00

A. novibelgi Climax

HYBRID ASTER.—Vigorous and showy. Well branched, with many large lavender-blue flowers. Does best in sun and well drained soil. One of the best. 3 to 5 feet. August and September.

Each-.35 10-\$2.50 100-\$20.00

A. novae-angliae

NEW ENGLAND ASTER.—Tall growing, of robust and erect habit. Handsome flowers of royal purple with yellow center. Use in sun and well drained soil. Spreads rapidly. Ideal for naturalizing. 3 to 5 feet. September and October.

Each-.30 10-\$2.00 100-\$15.00

A. novae-angliae roseus

ROSY NEW ENGLAND ASTER.—Of bushier growth than the preceding. Large rosy-pink flowers. Superb for fall color. 3 to 5 feet.

Each-.30 10-\$2.00 100-\$15.00

ASTILBE arendsi Juno

HYBRID ASTILBE.—Many branched, feathery sprays of deep pink bloom. Fine for cutting. Foliage attractive throughout the season. Grows 3 feet. Grows in sun or shade. Vigorous, sturdy. June and July.

Each-.50 10-\$4.00 100-\$30.00

A. arendsi Queen Alexandra

QUEEN ALEXANDRA ASTILBE.—Similar to Juno, but a lighter pink. Grows to 2 feet. Sun or shade. May and June.

Each-.50 10-\$4.00 100-\$30.00

BOLTONIA asteroides

WHITE BOLTONIA.—A profusion of white Aster-like flowers on tall branching stems. Spreads rapidly. 4 to 6 feet. Grows in sun or shade and in well drained and dry soils. August and September.

Each-.30 10-\$2.20 100-\$15.00

B. latisquama

VIOLET BOLTONIA.—Similar to White Boltonia with mauve-pink flowers. Easy to grow. Excellent for back-grounds.

Each-.30 10-\$2.20 100-\$15.00

CAMPANULA carpatica

CARPATHIAN BELLFLOWER.—Tufts of green with little blue bells held aloft on wiry stems. Unsurpassed for edging or rock gardens. 6 to 12 inches. Use in sun and well drained and dry soils. June to September.

Each-.35 10-\$2.50 100-\$18.00

C. carpatica alba

WHITE CARPATHIAN BELLFLOWER.—Similar to preceding except that flowers are white.

Each-.35 10-\$2.50 100-\$18.00

C. persicifolia

PEACHLEAF BELLFLOWER.—Large cup shaped bells of rich smoky-blue on tall graceful stalks. 1 to 3 feet. Use in sun or shade. A good cut flower. June and July.

Each-.35 10-\$2.50 100-\$18.00

C. persicifolia alba grandiflora

WHITE PEACHLEAF BELLFLOWER.—A white variety of above.

Each-.35 10-\$2.50 100-\$18.00

C. rotundifolia

HAREBELL.—The true Blue Bells of Scotland. Small clear blue flowers nod on slender stems. Suitable for rock gardens, crevices and slopes. About 1 foot. Endures dry soils. June to August.

Each-.35 10-\$2.40 100-\$18.00

CASSIA marilandica

WILD SENNA.—Showy clusters of bright yellow flowers. Small Locust-like foliage. 4 to 6 feet. Grows in ordinary and dry soils. July to September.

Each-.35 10-\$2.50 100-\$15.00

CENTAUREA dealbata

PERSIAN CENTAUREA.—Large striking rose-pink flowers resembling Asters. Excellent for cutting. 18 to 24 inches. Does best in sun. June to August.

Each-.35 10-\$2.50 100-\$18.00

CERASTIUM arvense

STARRY CERASTIUM.—Soft, downy silvery foliage and a profusion of pure white flowers. Forms a broad mat. Excellent for rock gardens. Thrives in ordinary and dry soils. May and June.

Each-.30 10-\$2.20 100-\$15.00

C. tomentosum

SNOW IN SUMMER.—Similar to above but blooms later and has larger flowers. Lovely gray foliage. Vigorous. May and June.

Each-.30 10-\$2.20 100-\$15.00

CERATOSTIGMA plumbaginoides

LARPENTE PLUMBAGO.—Dark green foliage. Deep blue flowers until frost. Of spreading habit. Valuable for late bloom, edging and rock gardens. About 8 inches. Sun or shade. August to October.

Each-.40 10-\$3.00 100-\$25.00

CHEIRANTHUS allioni

SIBERIAN WALLFLOWER.—Dazzling fiery orange-yellow fragrant blooms. A biennial that seeds itself readily. 15 to 18 inches. Excellent for rock gardens. Endures dry soil. May and June.

Each-.35 10-\$2.50 100-\$18.00

Hardy CHRYSANTHEMUM

CHRYSANTHEMUM.—The glory of the autumn garden. Plant in sunny, well drained, protected spots by house or wall rather than in the open, as this assures earlier and more perfect blooms after frost. After they are through flowering cut back to the ground and cover with leaves. Pot-grown plants for spring shipment. October to November.

Each-.35 10-\$2.50 100-\$18.00

AUTUMN GLOW.—Flowers tosy-red, large and freely produced. See page 32.

AUTUMN GOLD.—Brilliant golden-yellow. See page 32.

AUTUMN QUEEN.—Hardy, large flowering. Snow-white. See page 32.

BOSTON. — Pompom. Glowing bronzy-orange blooms, 1½ inches across, on tall branched stems. Very hardy. Late.

BRONZE BUTTON. — Button. An old favorite, free flowering. Many small rounded little blossoms in clusters. Stands frost well. Rich red bronze. Dwarf habit. Vigorous. A most satisfactory kind. Good bloomer.

EVE.—Fairly large flowers of rich deep pink. Medium dwarf.

GLORY OF SEVEN OAKS.—Rather dwarf. Clear canary yellow. Very early. One of the best. Double flowers in profusion.

MRS. FRANCIS BERGEN.—Creamy-white with center of rosy-pink with lighter pink tints in the outer edges. As the flower fades it changes to a charming pale lavender. One of the most valuable.

CHRYSANTHEMUM maximum

SHASTA DAISY.—Large glistening white flowers with yellow centers and long petals. Handsome glossy leaves. A vigorous grower. Fine for picking. 1 to 3 feet. Sun or shade. July and August.

Each-.35 10-\$2.50 100-\$15.00

CONVALLARIA majalis

LILY-OF-THE-VALLEY. — Delightfully fragrant, white, small bell-shaped flowers. Good foliage and spreads rapidly. 6 to 9 inches. An excellent ground cover for shady spots under trees. May and June.

Each-.35 10-\$2.50 100-\$20.00

COREOPSIS grandiflora

BIG COREOPSIS.—Large Cosmos-like flowers of golden-yellow. Superb for cutting. Single. 18 inches. Sun. Any well-drained soil. May to November.

Each-.30 10-\$2.50 100-\$15.00

Larpen Plumbago

Lily of the Valley

Big Coreopsis

Our prices include packing and are f. o. b. Framingham

Tall stately spikes
of the Larkspur.
An old favorite,
one of the most
beautiful.

The rich blue flowers come
in June. A second and third
crop can be expected if the
plants are cut back and not
allowed to seed.

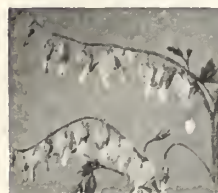

An old fashioned perennial border arranged to give continuous bloom from May to October.

Sweet William

Grass Pink

Bleedingheart

Foxglove

CYNANCHUM acuminatifolium

MOSQUITO-TRAP. A curious plant with lasting foliage and clusters of small waxy white flowers which catch and destroy insects. 18 inches. Sun or shade. May and June.

HOSTA lanceolata variegata

VARIEGATED PLANTAINLILY. Variegated green and white leaves. Blue flowers. Handsome for edging or for formal planting. 1 to 2 feet. Sun and shade. June and July.
Each \$.35 10—\$2.50 100—\$18.00

H. plantaginea grandiflora

BIG PLANTAINLILY. Handsome with broad big-ribbed leaves and tall stems of large waxy-white flowers. 1 to 2 feet. Sun or shade. August.
Each \$.50 10—\$4.00 100—\$35.00

H. sieboldiana

CUSHION PLANTAINLILY. Easy to grow. Very attractive leaves of metallic blue-green. Flowers pale blue. For edging. 1 to 2 feet. Sun and shade. August.
Each \$.35 10—\$2.50 100—\$20.00

IBERIS sempervirens

EVERGREEN CANDYTUFT. Wide mats of handsome narrow evergreen foliage. Clusters of pure white flowers completely cover the plant. Fine for borders and rock gardens. Likes sunlight. May.
Each \$.35 10—\$2.50 100—\$18.00

KNIPHOFIA uvaria pfitzeriana

BONFIRE TORCHLILY. "Red Hot Poker." Large, showy spikes of odd scarlet-orange flowers. Free flowering. Invaluable for cutting. 2 to 4 feet. Likes sun. August to October.
Each \$.35 10—\$3.00 100—\$20.00

LAVENDULA officinalis

TRUE LAVENDER. Compact little bushes of fragrant silver-gray foliage. Lavender blue flowers. A choice perennial for contrast or edging. Very fragrant. 12 to 18 inches. Likes sunshine. July and August.
Each \$.40 10—\$3.00 100—\$20.00

LIATRIS pycnostachya

CATTAIL GAYFEATHER. Also known as Blazing Star. Great rocket-like spikes of pale rosy-purple flowers. Blooms over long period. Attracts butterflies. Very showy. 3 to 5 feet. August to October.
Each \$.35 10—\$2.50 100—\$18.00

LOBELIA cardinalis

CARDINAL FLOWER. Slender spikes of bright scarlet flowers. Excellent for moist places. 2 to 3 feet. July and August.
Each \$.35 10—\$2.50 100—\$18.00

L. siphilitica

LARGE BLUE LOBELIA. Similar to above with deep blue flowers streaked white. Useful for edges of pond and streams. 2 to 3 feet. Sun and shade. August and September.
Each \$.35 10—\$2.50 100—\$18.00

LUPINUS polyphyllus albiflorus

WHITE WASHINGTON LUPINE. Fine, bold showy plant with spikes of white flowers. Good, clean handsome foliage. Cut off fading flowers to insure longer period of bloom. 2 to 3 feet. Sun or partial shade. Any well drained soil. June to September.
Each \$.35 10—\$2.50 100—\$18.00

L. polyphyllus roseus

BLUSH LUPINE. Similar to above. Rosy pink. Free bloomer. June to September.
Each \$.35 10—\$2.50 100—\$18.00

LYCHNIS chalcidonica

MALTESE CROSS. One of the most brilliant old-fashioned border plants with terminal heads of very showy orange-scarlet flowers. 2 to 3 feet. Sun. Any soil. June to August.
Each \$.35 10—\$2.50 100—\$18.00

L. viscaria splendens

ROSE PINK CAMPION. A splendid old-fashioned border plant. Dense tufts of leaves with bright rose-pink flowers. 12 to 18 inches. Sun. Any soil. June and July.
Each \$.35 10—\$2.50 100—\$18.00

LYSIMACHIA clethroides

CLETHRA LOOSESTRIPE. Bushy with oval foliage and long curving spikes of starry white flowers. Sun. 2 feet. Sun. June to September.
Each \$.35 10—\$2.50 100—\$18.00

MONARDA didyma

OSWEGO BEEBALM. Striking curiously-formed flowers of cardinal red. Vigorous, thrives anywhere. Easily naturalized. 2 to 3 feet. Sun and shade. July and August.
Each \$.35 10—\$2.50 100—\$15.00

MYOSOTIS palustris

TRUE FORGET-ME-NOT. Bright blue flowers with yellow eye, borne freely all summer. Low prostrate growth. Likes moist soil. May to August.
Each \$.35 10—\$2.50 100—\$18.00

NEPETA mussini

NEPETA. Forms a low compact broad mass of small gray green leaves covered with spikes of soft lavender-blue flowers. Continuous bloomer. Good for rock gardens. 8 to 12 inches. Sun and shade. May to September.
Each \$.35 10—\$2.50 100—\$18.00

Siebold Stonecrop

PHLOX amoena
AMOENA PHLOX. One of the best varieties for carpeting the ground, rockery or border. In the spring a sheet of rich bright pink flowers. On erect stems, 4 to 5 inches.
Each \$.35 10—\$2.50 100—\$18.00

P. divaricata
BLUE PHLOX. Delightful lilac-blue flowers borne on slender erect stems. Fragrant. 9 to 12 inches. Sun or partial shade. Splendid for naturalizing in woods. May.
Each \$.35 10—\$2.50 100—\$18.00

P. paniculata
PHLOX. Showiest and most valuable of all summer blooming perennials. Easy to grow in any ordinary soil. Prices, except as noted, are
Each \$.35 10—\$2.50 100—\$18.00

ANTONIN MERCE. Delicate lilac-blue. Free-flowering. Medium height.

BEACON. Brilliant cherry-red. Excellent. 36 inches.

CAROL VANDENBURG. New. Very choice. Lavender-blue. See page 32. \$.50 each 10—\$4.50.

COQUELICOT. Orange-scarlet. Very showy. Midseason.

CZARINA. Large heads of pearly-white flowers. Late.

ECLAIREUR. Large carmine-red blooms with salmon-pink center. Early.

ELIZABETH CAMPBELL. Light salmon-pink with dark red eye. Midseason. Very popular.

KARL FORESTER. New orange-red, see page 32. Each \$.50.

L'ESPERANCE. Lavender pink with white center. Mid-season to late.

MRS. W. VAN BENNINGEN. New, salmon-red, see page 32. Each \$.50.

RICHARD WALLACE. White with violet-rose center. Midseason to late.

RIJNSTROOM. Immense flower heads of clear lively rose-pink. A strong grower. Good color.

STELLA CHOICE. Large milk-white flowers flushed lavender. Vigorous.

VICTOR. Large bright salmon-pink blooms.

P. subulata
MOSS PHLOX. Trailing stems of mossy foliage lie close to the ground and are smothered in sheets of flowers. Excellent for rock garden or for covering slopes. Well drained soil. April and May.
Each \$.25 10—\$2.00 100—\$15.00

P. subulata alba
WHITE MOSS PHLOX. Pure white form of subulata. Each \$.30 10—\$2.00 100—\$15.00

P. subulata lilacina
LAVENDER MOSS PHLOX. A lovely pastel shade of lavender. Vigorous. Quick spreading. Foliage nearly evergreen. Each \$.30 10—\$2.00 100—\$15.00

P. subulata George West
BLUE MOSS PHLOX. Blue flowers. New. Vigorous. Each \$.50 10—\$4.50

P. suffruticosa
MISS LINGARD PHLOX. Blooms six weeks earlier than paniculata type. Large heads of white flowers with faint pink shadings in center. Foliage is disease-resistant. Best early White Phlox. June to October. Each \$.35 10—\$2.50 100—\$18.00

P. suffruticosa
PHLOX MISS VERBOOM. New. Similar to Miss Lingard except rose-pink. Splendid! See page 32. Each \$.50 10—\$4.50

PRIMULA hybrids
HYBRID ENGLISH PRIMROSE. Splendid low-growing little plants for shady borders or woodland paths. Fragrant flowers on erect stems vary from yellow to maroon. Prefers rich well drained soil with plenty of moisture. May and June. Each \$.50 10—\$4.50 100—\$40.00

PYRETHRUM roseum hybrids
PERSIAN OR PAINTED DAISY. Single or double daisies, white or rose to deep red with rich yellow centers. Foliage finely cut and ornamental. Particularly valuable for cutting. Of easy culture. 2 to 3 feet. Sunlight. June to September. Each \$.35 10—\$2.50 100—\$18.00

SALVIA azurea
AZURE SAGE. Many branching stems, studded with exquisite little flowers of pure sky-blue. Very beautiful for the fall garden. Profuse bloomer. 3 to 4 feet. Sun. August and September. Each \$.35 10—\$2.50 100—\$18.00

SEDUM acre
GOLDMOSS. The name is indicative of its appearance when in bloom. Fresh green foliage 1 to 2 inches high is topped with starry yellow blossoms. A successful ground cover on thin gravelly soil. Use on ledges and filling the crevices of paths, terraces or steps. Good at all times. June and July. Each \$.30 10—\$2.20 100—\$15.00

S. dasyphyllum
LEAFY STONECROP. Pretty tufted branching plant with dense bushy evergreen leaves. 2 to 4 inches. White flowers in flat clusters. Each \$.40 10—\$3.00 100—\$25.00

S. stoloniferum
RUNNING STONECROP. A hardy, leafy Sedum from Persia. Rather showy pink flowers in July. About 4 inches. Ordinary and dry soils. Each \$.35 10—\$2.20 100—\$15.00

S. lydium
LYDIAN STONECROP. A thick 2 inch carpet of mossy green foliage turning red in dry sunny locations. White flowers on short stems. Good for foliage contrast and rock gardens; ordinary and dry soils. Each \$.30 10—\$2.20 100—\$15.00

S. lydium glaucum
STAR MOSS. Similar to the above with pretty bluish green foliage. Each \$.35 10—\$2.50 100—\$20.00

S. reflexum
JENNY STONECROP. Trailing habit with erect 8 inch flower stems topped with clusters of yellow flowers. Each \$.35 10—\$2.50 100—\$20.00

S. sieboldi
SIEBOLD STONECROP. Forms a clump of short stems with broad glaucous leaves, pink margined, arranged in whorls of three. Distinctly different from the other Sedums. Excellent for edging or rock gardens. Rose-pink flowers at tips of stems. August and September. Each \$.35 10—\$2.50 100—\$20.00

S. spectabile brilliant
SHOWY STONECROP. An improved erect variety. Numerous thick succulent gray-green leaves. Large flower heads of brightest rose. Desirable for fall bloom. 12 to 18 inches. Sun or shade. Ordinary well drained soil. September and October. Each \$.30 10—\$2.50 100—\$18.00

SEMPERVIVUM tectorum
ROOF HOUSELEEK. A most curious plant with flat rosettes of thick evergreen leaves tipped with reddish-brown. Flowers pale red. 6 to 12 inches. Thrives in crevices and dry soil. June. Each \$.30 10—\$2.20 100—\$15.00

STATICE armeria
THRIFT. Thick tufts of narrow grasslike evergreen leaves. Ideal for edging. Flower light rose. 3 to 6 inches. Sun. Excellent for rock gardens. May and June. Each \$.30 10—\$2.50 100—\$18.00

"One Thousand One Garden Questions Answered"

By A. C. Hottes. A book of 320 pages giving correct understandable information on hundreds of garden problems commonly met with by beginners. Fully illustrated and carefully indexed. The result of many years experience and observation by experts. \$2.00. Postage \$.15.

In May or early June fill spots in the border with Gladioli for mid-summer bloom.

Regal Lily

Immense, fragrant blooms of exquisite texture and coloring.

STOKESIA laevis

STOKESIA. A charming hardy native perennial with lavender-blue flowers. Easy to grow in any open sunny position. Splendid for borders, 1 to 2 feet. June to October.

Each \$.35 10—\$2.50 100—\$18.00

THALICTRUM minus adiantifolium

MAIDENHAIR MEADOWRUE. Grayish foliage; resembles that of the Maidenhair Fern. Heads of feathery cream flowers on slender stems. 1 to 2 feet.

Each \$.35 10—\$2.50 100—\$18.00

THYMUS serpyllum coccineus

CRIMSON THYME. Forms a low creeping evergreen mat. Aromatic foliage covered in June and July with brilliant crimson scarlet flowers. Valuable for rock gardens and joints in paths.

Each \$.40 10—\$3.00 100—\$20.00

THYMUS serpyllum lanuginosus

WOOLLY THYME. Like Crimson Thyme with downy silver-gray foliage and rose colored flowers. Unique in its graceful manner of hanging over and veiling stones. June and July.

Each \$.35 10—\$2.50 100—\$18.00

TROLLIUS europaeus

GLOBEFLOWER. Blossoms like big double buttercups an inch across. Rosettes of handsome, deeply cut dark green leaves. 18 inches. Sun and partial shade. Likes moist soil. May and June.

Each \$.60 10—\$4.50 100—\$40.00

TUNICA saxifraga

SAXIFRAGE TUNICFLOWER. Low spreading clumps of trailing wiry stems and leaves dotted with tiny pinkish flowers all summer long. 6 inches. Excellent for rock gardens. July to September.

Each \$.35 10—\$2.50 100—\$18.00

VALERIANA officinalis

VALERIAN. An old time favorite, known as Hardy Garden Heliotrope. Aromatic finely divided foliage. Pinkish-lavender flowers with delightful fragrance. Sun and partial shade. June and July.

Each \$.35 10—\$2.50 100—\$18.00

VERONICA incana

WOOLLY SPEEDWELL. A white woolly-leaved perennial of rich appearance either in or out of bloom. Numerous blue flowers. Effective in borders or rock gardens. 1 foot. July and August.

Each \$.35 10—\$3.00 100—\$18.00

VERONICA longifolia subsessilis

CLUMP SPEEDWELL. One of the finest Speedwells. Very decorative and especially hardy. The flowered spikes are long, slightly curving and completely studded with brilliant deep-blue blossoms. Good for cutting. Excellent border plant. 2 feet. Sun. July to September.

Each \$.40 10—\$3.50 100—\$25.00

VERONICA spicata

SPIKE SPEEDWELL. Similar to above but of smaller habit, more graceful and better foliaged. Long curving spikes of violet blue flowers. 18 inches. Sun. June and July.

Each \$.35 10—\$2.50 100—\$18.00

VIOLA cornuta Jersey Gem

VIOLET-BLUE TUFTED PANSY. Absolutely hardy and vigorous. Large blossoms violet-blue, fragrant. Flowers continuously. Ideal for edging, or bedding. 8 inches. May to November.

Each \$.35 10—\$2.50 100—\$20.00

VIOLA tricolor

PANSY. The little old-fashioned Pansy found in old-time gardens. Sometimes called John Jump-up. Small yellow and purple faces. Seeds freely.

Each \$.35 10—\$3.00 100—\$20.00

VIOLA lutea splendens

YELLOW TUFTED PANSY. Clear golden yellow flowers in profusion all summer long. Ideal for edging, bedding and rock gardens. 6 inches. May to November.

Each \$.30 10—\$2.20 100—\$18.00

Spike Speedwell

Violet Blue
Tufted Pansy

"The Book of Bulbs"

By F. F. Rockwell. A recent book on cultivation of all kinds of bulbs and tuberous perennials. Special chapters on tulips, narcissi, lilies, gladioli, irises, peonies and other bulbs. The author is a well known and popular writer on many garden subjects. 264 pages. \$3.00. Postage \$.15.

An ideal flower for picking in summer—Gladioli have tall strong stems and splendid lasting qualities.

GLADIOLI

FOR gay color nothing takes the place of the "Glads." They give a festive note to the garden in late summer and are splendid for cutting. Plant them at intervals of two weeks and have bloom all fall. \$1.00 for 10; \$7.50 for 100.

AMERICA—Delicate lavender pink large and vigorous.

BARON HULOT—Rich deep indigo blue. Late mid-summer.

CARMEN SYLVA—Pure white, tall, many flowers at once.

CONSPICUOUS—Light blue with markings like a pansy.

CRIMSON GLOW—The very finest. Crimson.

EVELYN KIRTLAND—Rosy-pink, throat blotched scarlet.

GIANT NYMPH—Light rose-pink with creamy yellow throat. Very large. 6 feet tall.

GOLDEN MEASURE—Pure yellow, large flowering, tall. Fine!

GOLDEN WEST—Orange-red with gold reflex, lower petals tipped yellow.

GRETCHEN ZANG—Beautiful melting shade of soft pink, blending into scarlet on lower petals.

JACK LONDON—Light salmon. Orange flame tips.

L'IMMACULEE—Pure white. Medium sized flowers. Early.

LE MARECHAL FOCH—Very early. Soft shell pink.

LOUISE—Exquisite bright lavender. Large flowers.

MRS. DR. NORTON—Silvery white, edges tinted pink lower petals blotched with yellow and rose

MRS. F. KING—Flame red flowers, tall, earl

MRS. FRANK PENDLETON—Salmon pink. Penciled with rose. Early. Fine straight spike.

MR. KEUR—Rose pink, large flowers.

MRS. WATT—American Beauty red. Rich blue-green foliage.

PEACE—Giant flowers of good form on heavy straight spike. Beautiful white with pale lilac.

PRIDE OF LANCASTER—Ruffled deep salmon pink.

PRINCE OF WALES—Beautiful light salmon with orange shadings. Very early.

1910 ROSE—Pure rose pink. Narrow white lines through center of petals. A fine variety.

SALMON BEAUTY—Deep salmon with salmon-yellow throat. Very large.

SCHWABEN—Bright lemon yellow dark blotch in throat.

HARDY LILIES

Lilium auratum

GOLDBAND LILY. The sweet scented Lily of Japan. Large white flowers, spotted red, with a band of gold through each petal. Blooms in August and September. 2 to 6 feet.

Each \$.60 10—\$5.00 100—\$40.00

Lilium candidum

MADONNA LILY. The old-fashioned Ascension Lily. Handsome, pure white flowers with yellow stamens. June and July. 2 feet tall. Easy to grow. Plant 3 inches deep in August or September. A fall rosette of leaves establishes the roots for the following season.

Each \$.50 10—\$4.00 100—\$30.00

Lilium regale

REGAL LILY. Gorgeous, great white trumpets, rose tinted outside with rich yellow throats. Easy to grow. June and July. Illustrated at left. Unusually fragrant.

Each \$1.00 10—\$9.00 100—\$75.00

Lilium speciosum Melpomene

MELPOMENE LILY. Large white flowers shaded and spotted with deep crimson in July and August. An improved form of the popular Japanese Lily for mid-summer bloom.

Each \$.60 10—\$5.00 100—\$45.00

Lilium superbum

TURKS CAP LILY. Our finest native Lily. Tall, stately, 3 to 4 foot stalks bear rich clusters of nodding reddish orange flowers, spotted with red in July.

Each \$.40 10—\$3.00 100—\$25.00

Lilium tigrinum splendens

TIGER LILY. The improved orange scarlet Japanese Tiger Lily, spotted with black. Taller, healthier, and with larger flowers than others of this type. Succeeds anywhere.

Each \$.35 10—\$3.00 100—\$25.00

Tiger Lily

One of the showiest old-fashioned lilies—a bright orange scarlet.

LITTLE-TREE IRIS

IRIS are always satisfactory because of their free bloom, their wide range of color and their easy culture. They multiply rapidly and should be divided every 3 or 4 years. The ratings are those of the American Iris Society, on a scale of 100 points for perfection. 10% discount on orders for 50 or more of one variety.

Alcazar

Loreley

Monsignor

Handsome clear blue. Tall stems.		
SNOW QUEEN	\$35	\$3.00
Ivory white, orange throat.		

Our prices include packing and are f. o. b. Framingham

Nothing surpasses Peonies for a mass of color in the garden. The fragrant blooms are also prized as cut flowers.

LITTLE-TREE PEONIES

PEONIES, among the hardiest and most easily grown of the tuberous plants, thrive and bloom for many years without disturbance. Most varieties bloom in June and last well as cut flowers.

Some of the rarer kinds, as well as the best of the well-known varieties, are included in the following list which affords wide choice in color, type and season of bloom.

The rating given is that of the American Peony Society, based on a scale of 10 points, with ten as perfection.

Baronness Schroeder

Mons. Martin Cahuzac

Couronne d'Or

Name	Rating	Each
ALEXANDRE DUMAS	7.1	\$.75

A striking flower of bright violet-rose, often with creamy white petals in center. Fragrant and free blooming. Mid-season.

AURORE	8.0	\$1.00
--------	-----	--------

White to flesh pink petals, and yellow stamens. Gives a charming effect. Mid-season.

AVALANCHE	8.7	\$1.50
-----------	-----	--------

Creamy-white, slightly flecked with carmine. Very large, compact crown type. Fragrant. Strong grower. Mid-season.

BARONNESS SCHROEDER	9.0	\$1.50
---------------------	-----	--------

White petals with an opalescent sheen similar to mother-of-pearl, pale pink center. Tall, compact and free blooming. One of the finest of all peonies. Late mid-season.

BOULE DE NEIGE	8.0	\$1.00
----------------	-----	--------

Milk-white, crimson markings. Sturdy, erect and free. A fine cutting flower. Early mid-season.

CARNEA ELEGANS	7.8	\$1.00
----------------	-----	--------

Clear flesh color, broad petaled, with small yellow petals at center. Unusually fine. Late.

CHESTINE GOWDY	8.4	\$2.00
----------------	-----	--------

Crown type, silvery-pink petals with cream colored collar, center petals crimson tipped. Very fragrant. Fairly late.

COURONNE D'OR	8.1	\$.75
---------------	-----	--------

Large, pure white flowers with golden stamens. Very beautiful. Excellent for cutting.

DELACHEI	7.1	\$.75
----------	-----	--------

An old favorite of the rose type, with large, dark crimson flowers, silver tipped. Free blooming. Late mid-season.

DUCHESSE DE NEMOURS	8.1	\$.75
---------------------	-----	--------

Cup shaped blooms, with broad guard petals of white and narrow center petals tinted with sulphur yellow. Fragrant. Mid-summer.

EUGENIE VERDIER	8.6	\$2.00
-----------------	-----	--------

Medium size, compact. Semi-rose type, pale hydrangea-pink with deeper center. Very fragrant. Mid-season. A beauty.

FELIX CROUSSE	8.4	\$1.00
---------------	-----	--------

A brilliant, bomb-shaped flower. Ruby-red, center shading somewhat deeper. Very choice. Large, strong and fragrant. Mid-season.

Name	Rating	Each
FESTIVA MAXIMA	9.3	\$.75

Extra large rose type. Pure white with center splotched crimson. Early. Most popular.

GERMAINE BIGOT	8.5	\$1.00
----------------	-----	--------

Pale lilac-rose flowers with broad petals. Medium height. Mid-season.

GRANDIFLORA NIVEA PLENA	8.1	\$1.00
-------------------------	-----	--------

One of the oldest rose types. Large white flowers, centers sulphur shaded. Early, fragrant.

LAFAYETTE	7.8	\$1.50
-----------	-----	--------

Large rose type, fragrant, violet-rose with silvery reflex. Ideal for cutting. Mid-season.

LIVINGSTONE	8.1	\$1.00
-------------	-----	--------

Pale lilac-rose with center petals flecked carmine. Large, compact and vigorous. Late.

MME. BOULANGER	7.8	\$1.00
----------------	-----	--------

Large, full blooms, lasting well. Soft lilac-rose, bordered with silver. Mid-season. Fine.

MME. DE VERNEVILLE	7.9	\$.75
--------------------	-----	--------

Milk white, crimson touched flowers, plentiful and large. Early. Bomb type.

MME. EMILE GALLE	8.5	\$1.00
------------------	-----	--------

Soft pink tinted heliotrope and lavender. Late.

MARIE STUART	7.8	\$.75
--------------	-----	--------

Pale pink guards and crown, creamy white collar. Fragrant. Early.

MONS. MARTIN CAHUZAC	8.8	\$2.00
----------------------	-----	--------

The darkest peony available. Deep purple-garnet or maroon. Medium size. Early mid-season.

PHILOMELE	7.7	\$.75
-----------	-----	--------

Low flat crown, guard petals bright violet-rose, narrow amber yellow center petals suggesting Japanese type. Distinct and novel.

SARAH BERNHARDT	9.0	\$2.00
-----------------	-----	--------

Semi-rose type. Hugh flowers of shell pink, silver tipped. Magnificent. Fragrant. Late.

THERESE	9.8	\$3.50
---------	-----	--------

Enormous size, strong and floriferous. Rich soft, violet-rose with lighter center. Mid-season. One of the greatest of all peonies.

VENUS	8.3	\$1.00
-------	-----	--------

Crown type. Hydrangea-pink with collar of flesh white. Fragrant. Good blooms. Mid-season.

INVITE THE BIRDS TO YOUR GARDEN

Feeding Shelter No. 63

Rustic Feeding Shelter No. 20

Country Life House No. 62

No. 8A

No. 662

No. 545

WELCOME the birds to your garden and encourage them to make it their home. They will delight you with their joy of living, their constant motion, flashing colors and sweet songs. If you but furnish them with comfortable quarters, a quiet place to build or bathe or find their food, they will soon become your friends and you will look for them each day. Place these bird houses and bird baths in secluded spots free from interruption and safe from marauding cats. The birds will soon find them.

"Have a Heart" Bird Feeding Shelter No. 63

Very popular. Designed by one who knows and loves birds. Made of rustic cedar. The wire mesh in the back holds the suet. A most acceptable yet inexpensive gift. \$2.60 each; 2 for \$5.00. Postage \$.25.

Rustic Feeding Station No. 20

Of natural bark with closed ends and roof, open at sides. Neat and inexpensive. \$1.50 each. Postage \$.25.

Rustic Bird House No. 19

A weather-proof home, strongly made to last many seasons. Floor, attached by brass screw eyes, may be removed for cleaning. Made with small or large opening. State preference. \$1.50 each. Postage \$.25.

Rustic Cabin No. 16

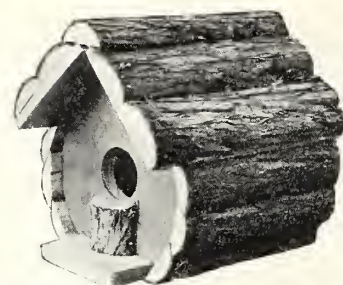

A staunch and spacious little home for bluebirds. Keeps dry in any weather. Bottom easily removed for cleaning. Small or large opening. State preference. \$1.50. Postage \$.25.

Little-Tree Bird House No. 50

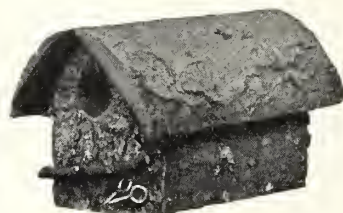

This rustic cedar house is in complete harmony with natural surroundings and appeals strongly to feathered guests. If hung properly the house is safe from the ravages of cats. Furnished with large or small opening. Please indicate which you prefer. \$1.75. Postage \$.25.

Country Life House No. 62

Place in a quiet and sheltered spot. Bluebirds will find this a most acceptable habitation. Built to last for years. \$1.75. Postage \$.25.

Little Tree Bird House No. 50

Rustic Cabin No. 16

Rustic Bird House No. 19

Berried Shrubs for the Birds

EVERY garden should have some of the fruiting shrubs and trees, for the birds are particularly fond of the delicacies they offer. The following are recommended:

Wall Fountain No. 78

WATER INTEREST

THE introduction of water will increase your enjoyment of your garden tenfold. It will add life and interest. Whether it be the sparkling motion and cheerful sound of a fountain playing or the reflections of Lily pads and grasses in a quiet pool, water has a peculiar charm of its own. The fountain figures shown on this page have been selected with great care from many kinds available and all of them are on display at our glass garden store.

WE WILL BUILD A POOL TO ORDER

Little-Tree Farms would like to plan and build a pool for you. In most cases, we will gladly submit suggestions and estimates without obligation. If the nature of the estimate is such that a service charge becomes necessary we will so inform you and await your explicit authorization before incurring any costs whatsoever.

GARDEN FURNITURE

Seat No. 150

Bench
No. 733

Bench
No. 192

Gateway No. 165

Rose Arch No. 85

Arbor Seat No. 105

A FEW suggestions from the unlimited supply of artistic garden furniture exhibited at our Garden Store are pictured here. Especially striking and ultra fashionable are the big beach umbrellas in brilliant colors and the new steel furniture in several different styles. We urge you to visit our Garden Store and see these pieces for it is impossible to do justice to them here.

Garden Seat No. 150

A handsome terra cotta seat from California, with a decidedly classic air. Fits either a formal or an informal setting. Height 29 inches. Seat 18 inches wide. In two lengths. Bench, 38 inches long, \$70.00 Chair, 23 inches long, \$35.00 Shipped f.o.b. California. Crated weight 200 and 100 lbs.

Lawn Bench No. 733

Useful and attractive. Gray artificial stone. Very popular. 19½ inches high, seat 60 inches wide, 3 inches thick. \$22.00. Freight or express collect.

Lawn Bench No. 192

A charming garden bench of gray terra cotta with limestone top measuring 18 by 54 inches. \$49.00. Express collect.

Very New! See these fascinating tea tables with their sets of spring steel furniture and gay umbrellas—displayed at our Garden Store.

ARCHES and ARBORS

Gateway No. 165

One of the best gateways made. Sturdy construction, excellent proportions and manifest attractiveness. Wood painted white. Depth 3 feet. Outside base width 42 inches.

Complete with gate, hinges and latch as illustrated, \$25.00. Without gate \$16.00. Express or freight collect.

Gateway No. 166

Similar to No. 165 but has cross slats in pairs and extending slightly beyond outside edges or arch rails, as in Rose Arch No. 80.

With gate \$25.00 Express or
Without gate \$16.00 freight collect

Rose Arch No. 80

Simple, and inexpensive but substantial and attractive. Especially good for climbing roses and blossoming vines.

Popular for arching garden paths and for entrances. An excellent arch at a remarkably low price. Well made of wood painted white.

3 feet wide, 2 feet deep \$11.00 Express or
4 feet wide, 2 feet deep 12.50 freight
5 feet wide, 2 feet deep 14.00 collect.

Arbor Seat No. 105

A very decorative piece of furniture which is useful in many places in the garden. A delightful shady bower when covered with roses or other vines. 5 feet wide, 2 feet deep \$36.00. Express or freight collect.

Rose Arch No. 85

This handsome arch, made of cypress, is an extremely graceful design for spanning wide paths. Artistically right and most attractive

covered with climbing roses or other vines. Painted white. In 3 sizes, all 2 feet deep.

6 feet tall, 4 feet wide \$18.00
7 feet tall, 5 feet wide 20.00
8 feet tall, 6 feet wide 21.00

Express or
freight
collect

Arch and Seat No. 32

A comfortable, graceful, substantially built arch support for roses, combined with seat. Is particularly appealing at the end of a garden path or against evergreens or shrubs.

Equally good for a large or a small property. Seat 4 feet long, 18 inches wide. Arch and seat with back lattice as illustrated, \$40.00. Arch and seat alone, \$36.00. Express collect.

Arbor Seat No. 135

Covered with vines or climbing roses this arbor makes a delightful retreat for a small backyard as well as for the larger yard of a more pretentious property. The 40 inch space between the seats is ample to admit a tea table.

This piece may be used with lattice if desired. Rugged wooden construction, painted white. \$110.00 each. Express or freight collect.

Double Column Pergola No. 30

Attractive at the end of the garden or dividing lawn and garden. Rugged wooden construction, painted white.

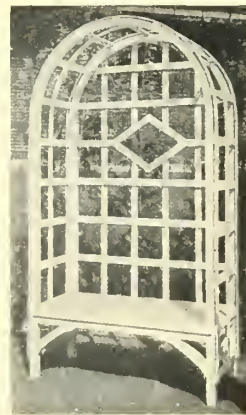

Complete as illustrated, 40 feet long, made of four 10 foot sections and 8 feet broad, with back lattices, \$343.00.

Sold also in sections as follows:

Pergola, first 10 foot section \$93.00; additional sections \$62.00. Lattice (for both sides) per section \$25.00. Express or freight collect.

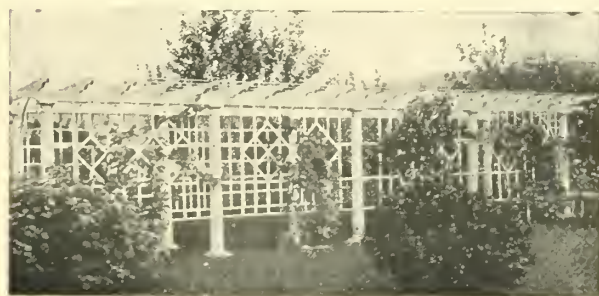

Rose Arch No. 80

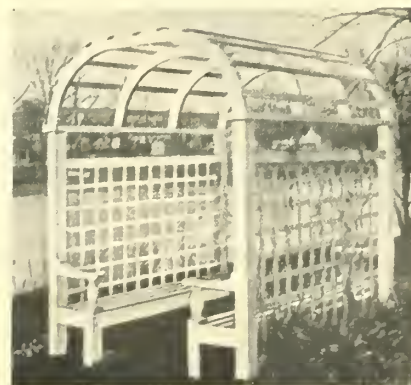

Arch and Seat No. 32

NOTE: Many other styles of furniture on display at our big glass Garden Store. If you don't find what you want in this catalogue come to the store or write us.

(14)

(1) Asparagus Knife

Convenient for cutting asparagus or digging dandelions. \$.50 Postage \$.15.

(2) Pruning Knife No. 3-C

Heavy glazed blade of finest imported steel with sharp cutting edge. Cocoa handle iron lined. A very practical tool of unusual strength. This is a most useful knife for hundreds of purposes. The handiest knife of all for pruning, for gathering long sprays of flowers or greens for decoration and for cutting tall perennials to the ground. Every one should have one. \$2.00. Postpaid \$2.10.

(3) Ladies Rose Shears No. 14

Substantially made of forged steel. Nickel plated and polished. Volute spring and end fastening clip. 6 inches long. \$1.50. Postpaid \$1.65.

(4) Swiss Pattern Pruning Shears No. 85

Convex ground steel blades riveted to full polished malleable iron handles. Brass springs and ratchet regulating nut. Removable end clip. 8½ inches long. \$2.50. Postpaid \$2.65.

(5) California Pattern Pruning Shears No. 50

Black finish with polished blades. A practical and sturdy tool, for pruning shrubs, evergreens and small trees. 9 inches long. Moderately priced at \$1.00. Postpaid \$1.15.

(6) Flower Scissors No. 575

Imported, full nickel plated, and finely made of stainless steel. Note how it holds the flower as well as cuts it. 6¾ inches long. Price \$2.25. Postpaid \$2.35.

(7) Chinese Flower Scissors

A splendid pair of shears and the handiest to use. Strongly made with steel blades that keep their edge. Makes a sharp clean cut. Handles are bound in red and curve back to protect the fingers. An ideal gift. \$2.00. Postpaid \$2.10.

(8) Plant Markers No. R. G.

Covered with green enamel. Label 5 inches by 1½ inches. Length 2 feet and 3 feet. \$.35 each, \$3.00 for 10, \$12.50 for 50. Express collect.

(9) Flower Holder No. DZ

Made of heavy rust-proof metal. Very useful and durable. 3 inches in diameter, \$.75; 4 inches \$1.25; 5 inches \$1.75. Postage \$.15 each.

(10) Transplanting Trowel

The handiest tool for digging and setting small plants or working in narrow quarters. Long, narrow curved blade, wooden handle. \$.65. Postpaid \$.80.

(11) Zenith Sprinkler

One of the most successful, low revolving sprinklers ever manufactured. Waters a circle 40 feet in diameter. Durable brass head and arms so made that friction is practically eliminated. Thoroughly recommended. Height 3½ inches. \$1.25. Postage \$.25.

(12) Climax Sprinkler

A low, inexpensive sprinkler with revolving head. Stands 3 inches high. \$1.00. Postage \$.15.

(13) Rain King Hose Nozzle

Adjustable for fine or coarse spraying. Made of brass, cannot rust, clog or give trouble. Lasts a lifetime. \$1.50. Postage \$.15.

(14) Hedge Shears No. 100

An exceptionally strong, and convenient tool for trimming hedges of all kinds. Imported with blades of finest English steel. Splendidly made for long wear with durable wooden handles, attached to heavy metal ferrule for additional strength. \$3.75. Express collect.

(15) Kneeling Pad No. L. C.

Just right when weeding flower beds, tending cold frames or transplanting bulbs or annuals. A well-made matting covered cushion with protective rim on three sides. \$2.00. Postage \$.25.

Kneeling Pad S. R. No. 1.

A flat springy pad of red rubber measuring 8 inches by 16 inches by ¾ inch thick. Convenient when ground is damp or a lot of work is to be done in one place. \$.60. Postage \$.15.

(16) "Little Tree" Grass Shears No. A355

Strongly made with spring steel handle and highly polished. A very popular and serviceable tool for trimming turf along the edge of the flower beds or path. \$1.00. Postpaid \$1.15.

(17) Speedy Cultivator No. 3 FW

A 3 tined extra narrow weeder—suitable for work between perennials and shrubs where a larger tool cannot go. Strong, light weight and easily handled without fatigue. 4 foot handle. \$1.00. Express collect.

(18) Cultivator Hoe No. 33

A lightweight tool. Popular with women. Particularly adapted for use in the backyard garden around small flower beds and rows of vegetables. Cultivates 3 inches deep. Leaves beds in ideal condition. 4 foot handle. \$1.25. Express collect.

(19) "Little Tree" Garden Shovel No. L

An exceptionally light weight shovel, very strong and well made. Straight wooden handle, 4 feet long. For easy digging. A favorite with women. \$1.50. Express collect.

(20) Ladies' Hoe

A strong, neat little hoe of light weight. Short 5 inch blade. 4 foot handle. Very popular with women. \$.90. Express collect.

(21) "Little Tree" Pruning Saw and Hook

Attach this saw blade to a long handle and it is possible to reach out of the way branches far up tall trees. A convenient saw for the orchard. 12 inch blade, \$3.25. Blade with 10 foot handle \$4.25. Express collect.

(22) Improved Tree Pruner No. W

An easily handled tool for thinning out high branches. Worked by a lever attached to a strong wooden handle 10 feet long. Indispensable for the large estate or orchard. \$4.25. Express collect.

(23) York State Pruner No. 22

A handy saw for general utility around house and farm as well as for pruning. The narrow point permits use in close quarters. Blade of blued steel, 20 inches long, 1 inch wide at tip, 5 inches at base. Beech handle gives a large comfortable grip. \$2.25. Express collect.

ALL ROADS LEAD TO LITTLE-TREE FARMS

LITTLE-TREE FARMS is situated in Framingham Centre, Massachusetts, almost midway between Boston and Worcester and about 20 miles from either city. It may be readily reached by train (Boston and Albany) and inter-urban trolley (Boston and Worcester) from the east or west and by motor over fine state highways from any point in New England.

It lies in a countryside made beautiful by both nature and the hand of man and enriched by a heritage of tradition reaching back to colonial days. The map inside this flap shows plainly the major routes to Little-Tree Farms, and the route directions below indicate as well some of the points of chief interest along the way. This map is drawn as though viewing Eastern Massachusetts at a fairly acute angle from an airplane so the distance circles marked around Framingham Centre appear in perspective as ovals. Route numbers are added for your convenience.

There are really two farms, hence the plural in the name though to symbolize their essential unity they are referred to in the singular. Farm No. 1 is located near Framingham and is the main propagating nursery. As its activities are confined to propagation and the wholesale trade, it is not open to the general public.

Farm No. 2, on the other hand, lying on Pleasant Street half a mile out of Framingham Centre, is open at all times to our friends and is more fully described and shown on the inside of the front cover.

However, no words or pictures can give an adequate idea either of its beauty or its activities, hence with our best bow and smile of welcome we **very cordially invite you to come to Little-Tree Farms!** Let us assure you, you will find your visit well worth while.

MAP SHOWING ROUTES TO LITTLE-TREE FARMS AND POINTS OF INTEREST

A "winter garden" of evergreens, brightened up for the summer with perennials. Designed and planted by Little-Tree Farms for a client in Newton, Massachusetts.

AS part of the complete service pledged to its clients, this firm maintains a separate service organization designed to solve all their problems in the fields of landscaping and forestry.

This organization is staffed with highly trained, responsible landscape architects, engineers and horticultural experts at its head, backed by all necessary resources of men and material to function adequately in these fields. It will cooperate with your own architect, acting as a contracting firm to carry out his plans for grading, construction or planting, or develop the whole project for you from its inception, from plans to the final planting.

This service is **not** free. It is not given away as a bait for the purchase of nursery stock, nevertheless, operating as it does under **one estimate, one overhead, one profit**, it is the most economical method yet devised for the handling of any landscape or forest project.

Little-Tree Farms will be pleased to answer any questions as to the cost of this service as applied to any particular problem and to those interested, will send special literature that describes and illustrates this service more fully.
